

DUW 2018

Questions – STFC RAL

?? VMDIRAC availability ??

- At RAL we provide access through Nova (OpenStack standard), Horizon (web interface), EC2 and OCCl.
- Nova and OCCl should work with x509.
- EGI CheckIn should be available “soon” – we have to do a couple of OpenStack upgrades first. Aiming to be able to use CheckIn around August timescale.

?? LFC to DFC migration ??

- t2k, snoplus, mice – use LFC@RAL
- And they are using GridPP DIRAC

?? DIRAC vs S3/Swift interface ?? (gfal2, LHCb)

- Discussed last days – new gfal2 release available
- Probably no longer show stopper for LHCb (to use ECHO@RAL)
- Also SKA to start testing ECHO from GridPP DIRAC

MultiVO DIRAC instances
