

Blois 2018: 30th Rencontres de Blois on "Particle Physics and Cosmology"

Wednesday 6 June 2018

Parallel Session Astro+Cosmo (14:00 - 16:00)

-Conveners: Sherry Suyu

time	[id] title	presenter
14:00	[203] The BAHAMAS Project	MCCARTHY, Ian
14:20	[208] BICEP/Keck: Constraining primordial gravitational waves with CMB polarization observations from the South Pole	DIERICKX, Marion
14:40	[213] Recent Results from the South Pole Telescope and Status of SPT-3G	ANDERSON, Adam
15:00	[222] CHIME	VANDERLINDE, Keith
15:20	[296] Results from the CUORE experiment	BIASSONI, Matteo

Parallel Session Astro+Cosmo (16:30 - 19:30)

-Conveners: Kimberly Palladino

time	[id] title	presenter
16:30	[210] Gamma Rays from the Centers of the Milky Way and Andromeda Seen with the Fermi-LAT	Dr HOU, Xian
16:50	[214] A search for primordial black hole evaporation events with the VERITAS experiment	ZITZER, Benjamin
17:10	[202] Transient Gamma Ray Sources (MAGIC)	BERTI, Alessio
17:30	[224] LATTES: a new detector concept for a gamma-ray experiment in the Southern hemisphere	TOMÉ, Bernardo
17:50	[211] Neutrino astronomy in the Mediterranean: ANTARES latest results and perspectives for KM3NeT/ARCA	FERRARA, Giovanna
18:10	[223] Point-source searches with IceCube	BRON, Stéphanie
18:30	[217] Recent results from ANITA	CREMONESI, Linda
18:50	[218] Pierre Auger Observatory: latest results and prospects	DA SILVA CONCEICAO, Ruben Mauricio
