Amsterdam Scientific Instruments B.V

Monday, 23 April 2018 17:20 (10 minutes)

Amsterdam Scientific Instruments (ASI) manufactures and markets hybrid pixel detectors which are developed in collaboration with CERN. ASI's detectors have unprecedented sensitivity and speed, making ideal for beam-sensitive materials in the field of CT, X ray imaging, SAXS, FEL, and Electron Diffraction.

Visit our booth to get an in-depth view of how our technology can excel your X ray and Electron application

Presenters: BROUWER , Hans; RADHOE , Hans

Session Classification: Presentations with demos
