
HSF Packaging Group, #14

Ben Morgan (University of Warwick), Graeme Stewart (CERN EP-SFT)

Updates since last meeting

- **Document started on defining a test stack of packages**
 - Input from SuperNEMO, FCC, LHCb, Art, Wire-Cell and CMS (Thanks!)
- **Identify Use Cases for HEP packaging tools:**
 - HSF-TN-2016-03 outlines features, but not very explicit on *why* these are needed, nor *who requires them* (packager, runtime client, developer client)

Today's Meeting

- **We have an update from Ben on the Test Stack document and package list**
- **Graeme will kick off the discussion on Use Cases**
 - ATLAS inspired, but hope it will motivate additional input, whether experiment specific or more generic
- **AOB/Next Meeting**
 - 29th November, 15:00 CERN time?
