## **Overview of all superconducting splices in the LHC machine**

*Monday, 25 January 2010 17:00 (20 minutes)*

We will first draw the inventory of the superconducting splices in the LHC machine and classify them by their criticality. The main issues for each splice type will be reviewed with a special emphasis on corrector circuits based on the past experience and knowledge accumulated during hardware commissioning. Finally, we will discuss the issues still open and the plan of action for the next months.

**Presenter:** CATALAN, Nuria

**Session Classification:** Session 2 –Magnets and splices consolidation shutdown 2010/2011
