What will PS2 + SPL provide for LHC?

Thursday, 28 January 2010 08:30 (25 minutes)

What will this upgrade bring for the LHC in terms of beam (intensity, structure, emittance and quality) ?
Realistic construction schedule including timeline for commissioning of the complex until it can deliver at least the present ultimate beam. Reliability issues as well as the cost of construction and operation of the new complex should be addressed.

Presenter: BENEDIKT, Michael

Session Classification: Session 7 - Future Upgrade scenarios for the Injector Complex
