Safety Taskforce follow-up in perspective with 2nd LHC physics run in 2011

Tuesday, 26 January 2010 17:00 (10 minutes)

Following the accident in sector 3-4 of 19th September 2008, the related safety of personnel in the LHC underground areas was investigated and preventive and corrective measures recommended. All efforts have been deployed to fulfill the short term recommendations of the Task Force. Still, many of the solutions implemented are of temporary nature and valid only for the 1st LHC physics run in 2009/10. The presentation address the safety measures that still need to be implemented for the 2nd LHC physics run in 2011.

Presenter: TRANT, Ralf

Session Classification: Session 4 - Safety for Personnel Underground - He Evacuation
