

CERN

European Organization for Nuclear Research

- Founded in 1954 by 12 countries
- Now: 22 member states, 4 associate MS (India, Pakistan, Turkey and Ukraine) + 2 observers EU and UNESCO)
- Serbia, Cyprus and Slovenia are in pre-stage to membership
- More than 12000 users from all over the world

1954: Convention establishing the Organization - original signatures

The 22 member states

History of the Universe

FUTURE

CLIC – Compact Linear Collider Unprecedented energies beyond LHC for electrons and their antimatter twins, positrons in 50 kilometer long accelerator complex

FCC – Future Circular Collider

An international collaboration to explore concepts for the most powerful particle collider in 100 kilometer long accelerator tunnel

The High-Luminosity LHC

HL-LHC project aims to increase the potential discoveries after 2025 by increasing the LHC luminosity (the number of collisions occurring in a given amount of time...)

Key Ingredients to CERN's success

- Facility was a priority of the science community
- Strong funding commitments and host role (CH+FR)
- Organisation populated with critical experience
- Realistic goals
- Experience over 'hope'
- Openness and transparency
- Collective ownership of problems and solutions
- Success requires energy and enthusiasm
