- **Discovery of weakly produced SUSY:**
  - Is there any topology that is out of radar?
- **Interpretation of searches in simplified models:**
  - Is there any simplified model interpretation which should be performed and which is not done yet by any of the collaborations?
- **Interpretation in real models:**
  - Is the run 1 approach (do simplified models, then do pMSSM scan) satisfactory for the community?
  - Are "simplified pMSSM models" interpretation giving useful information?
