

# Transition to EGI on ASGC

- Keep running APROC to support WLCG Tier-2 Centers and e-Science in Asia and collaborate with Europe.
  - E-Infrastructure extension and e-Science collaboration support :
    - 28 production sites in 11 countries
    - Over 9,800 CPU Cores and >3.4 PB in October 2009
  - Maximize quality of Grid Services:
    - 24 out 28 sites signed SLA
    - Half sites average reliability reach over 80%
- ASGC leads the JRU (Joint Research Unit) of Asia Pacific partners to join EGI-InSPIRE
- ASGC also joins ROSCOE to support HEP applications
