

May 2019 in Wuhan, China at the HUST Campus

Opening of the 2nd season of the International Summer School Series on **INtelligent Signal Processing for FrontIER Research and Industry** **POSTERS SESSION & RESULTS**

Selection Procedure:

The Selection was done by both the school attendants who presented the posters and the jury of 8 evaluators who participated to the overall posters presentation on May 25 at HUST and then discussed over emails about the evaluation that each one made and how to combine with the Students selection results. The selection was quite difficult because a number of very good posters and oral presentation.

Final results:

Best Poster: Dan ZHANG

BS at the Department of Physics and Astronomy, Shanghai Jiao Tong University, Shanghai, China.

Now at Doctoral Program in the Department of Physics of the University of Maryland, USA.

She works on “*WIMP Direct Detection with PANDAX-4T Detector*”

2nd Best Poster: Patrick MORIISHI FREEMAN

Master of Science in Physics at the University of California in Santa Cruz

Now PhD in Physics and Astronomy at the University of Birmingham, UK; working in the *ATLAS experiment at CERN-LHC*.

3rd best Poster: Anyi LI

Undergraduate at the Ji Luan College, at the Automation School of Qianhu and Information Engineering, Nanchang University, Nanchang, China.

Their posters as well as the ones of all the students who participated to this poster session (38 in total) are included here in the Posters sessions with the photo of each presenter.

Note that 5 students of the School of IA and Automation of HUST could not attend the poster presentation session (but their posters are included in this Timetable) but their posters have been revised by the Jury of evaluators.
