

## **CP Violation in Charmed Baryon Decays at LHCb**

Carla Göbel, PUC-Rio

On behalf of the LHCb collaboration

We present the recent result on the measurement of the difference of CP asymmetries,  $\Delta A_{CP}$ , between the Cabibbo-suppressed decays  $\Lambda_c^+ \rightarrow pK^-K^+$  and  $\Lambda_c^+ \rightarrow p\pi^-\pi^+$ . We also show a few new results on charmed baryons from the LHCb collaboration.
