

# EOSC-hub

Integrating and managing services for the  
European Open Science Cloud

09 January, EOSC-hub Kickoff

Tiziana Ferrari/EOSC-hub Project Coordinator

EOSC-hub receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 777536.

---

**EOSC-hub** mobilises providers from **20** major digital infrastructures, EGI, EUDAT CDI and INDIGO-DataCloud **jointly** offering **services, software and data** for advanced data-driven research and innovation.

---

## Project figures

- 100 Partners, 76 beneficiaries (75 funded)
- 3874 PMs, 108 FTEs, more than 150 technical and scientific staff involved
  - €33,331,18 of which the European Commission funds €30,000,000
  - €2,155,540 (~8 FTEs) are co-funded by the EGI Foundation and its participants + €1,221,094 (~5 FTEs) from EGI participants
- 36 months: Jan 2018 - Dec 2020 (18 month reporting period)

---

# Mission

The project will create the **Hub** a federated integration and management system for the future

---

# What does the Hub provide?

- Contact point for researchers and innovators to discover, access, use and reuse a broad spectrum of resources for advanced data-driven research
  - Catalogue of resources and services
  - Humanities, Engineering, Medical and Health Sciences, Natural Sciences
- Corpus of policies, processes and federation services (community-defined)
  - Principles of engagement and EOSC “core” services
- Quality assurance reviews
  - Manage end-to-end service level management performance
- Competence Centres and a Joint Digital Innovation Hub
  - Specialized Technical support, training

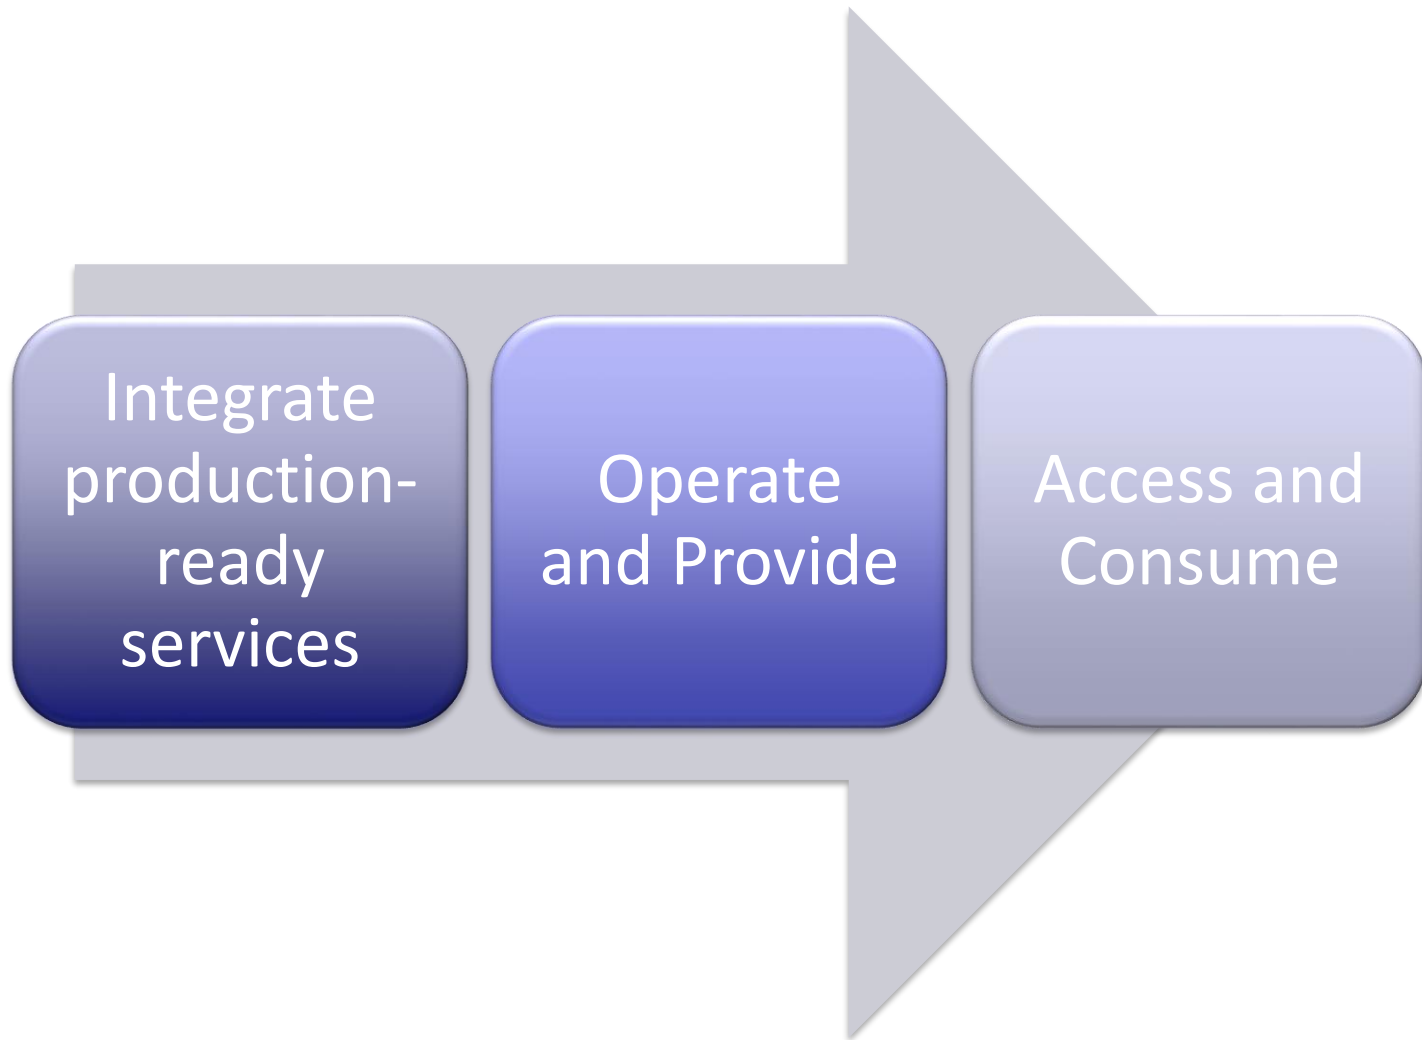

---

# The Hub and the Three Os

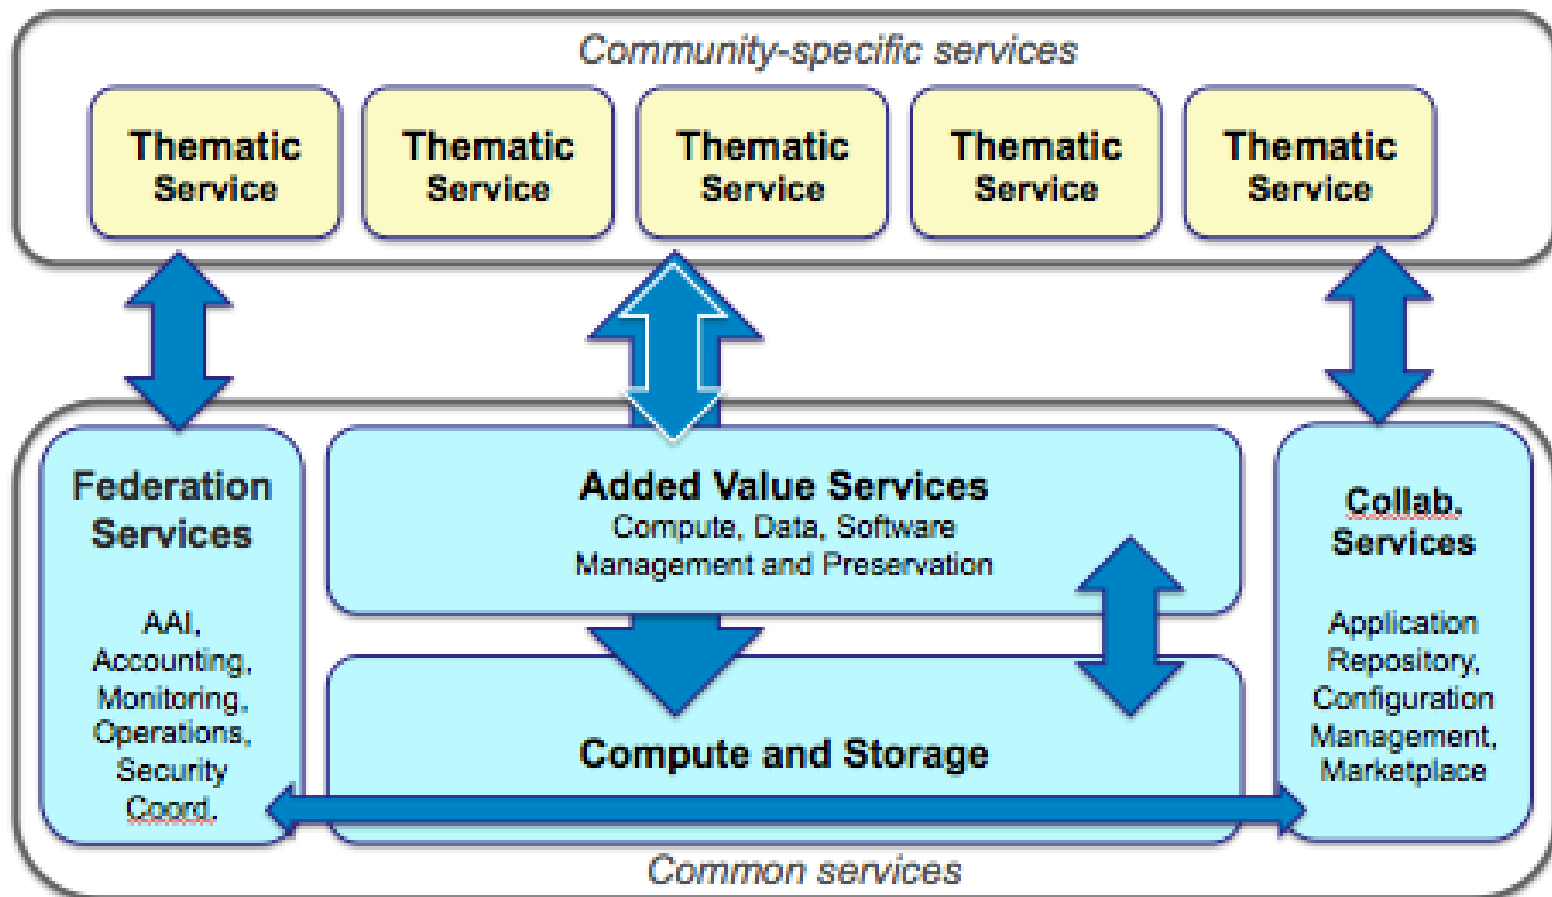

- **Open Science**
  - Resources and services for sharing, discovery access, use and reuse
    - Collaboration with OpenAIRE-Advance
- **Open Innovation**
  - A open collaborative effort of service providers and user communities
    - Co-design of process with Competence Centres and a Joint Digital Innovation hub
- **Open to the world**
  - Aggregates services from local, regional and national e-Infrastructures in Europe and other regions of the world

---

# From integration to utilization

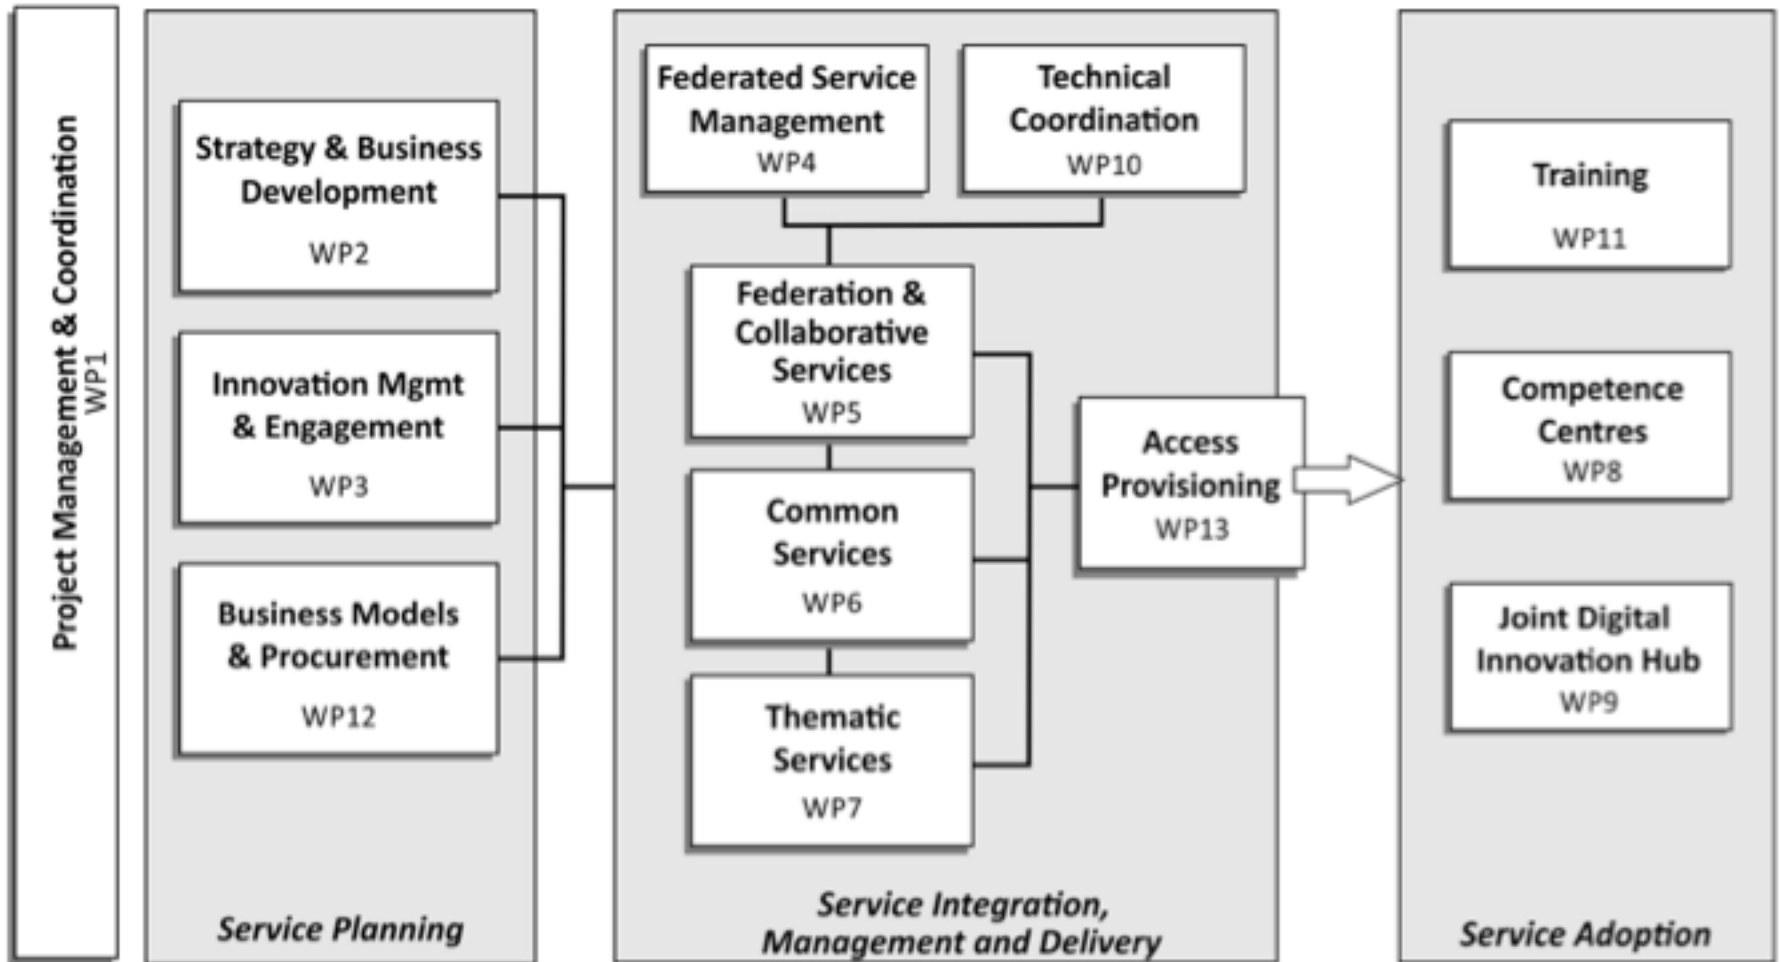

# Architecture

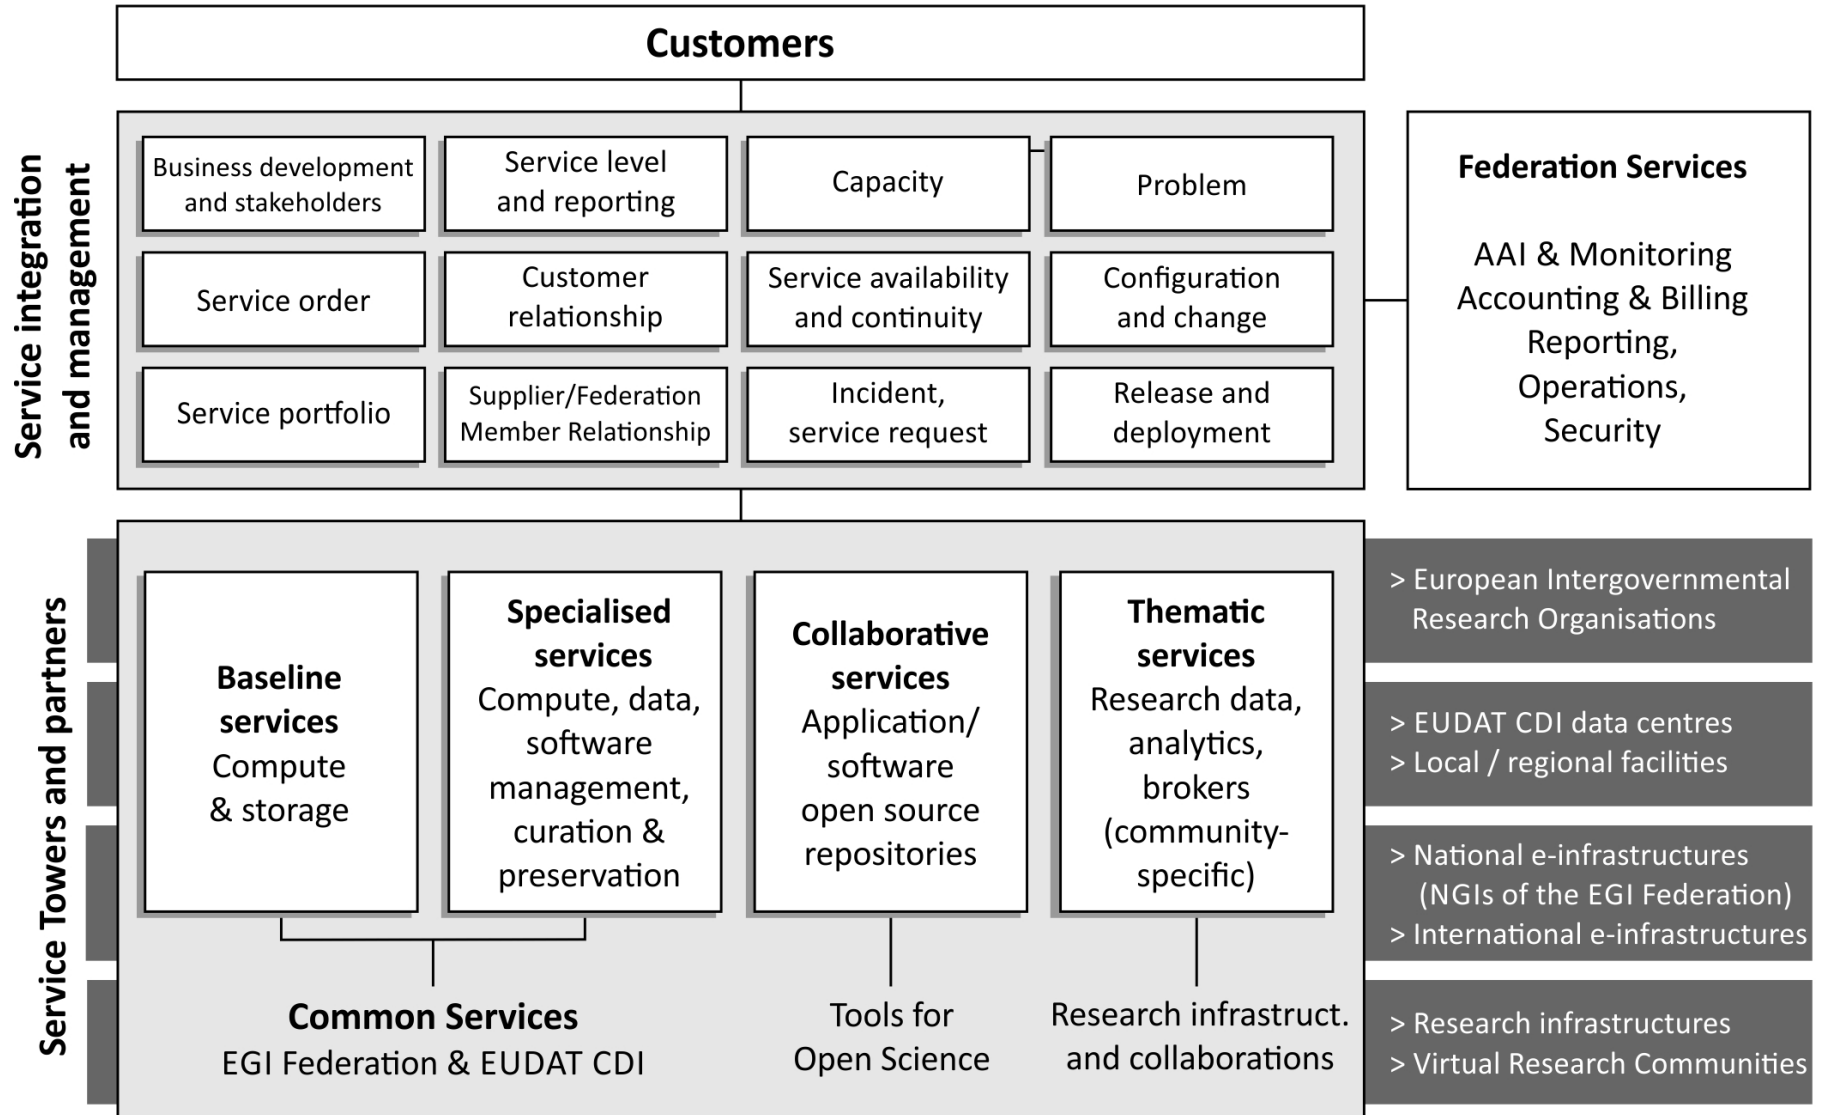

# Work packages

# Service Integration and Access Management

---

## Service Providers 1/2

### e-Infra

EGI Federation

EUDAT CDI

### Humanities

Language and  
literature  
(CLARIN)

Arts (DARIAH)

### Engineering

Environmental  
engineering  
(sea vessels,  
LNEC)

Civil  
Engineering  
(Disaster  
Mitigation)

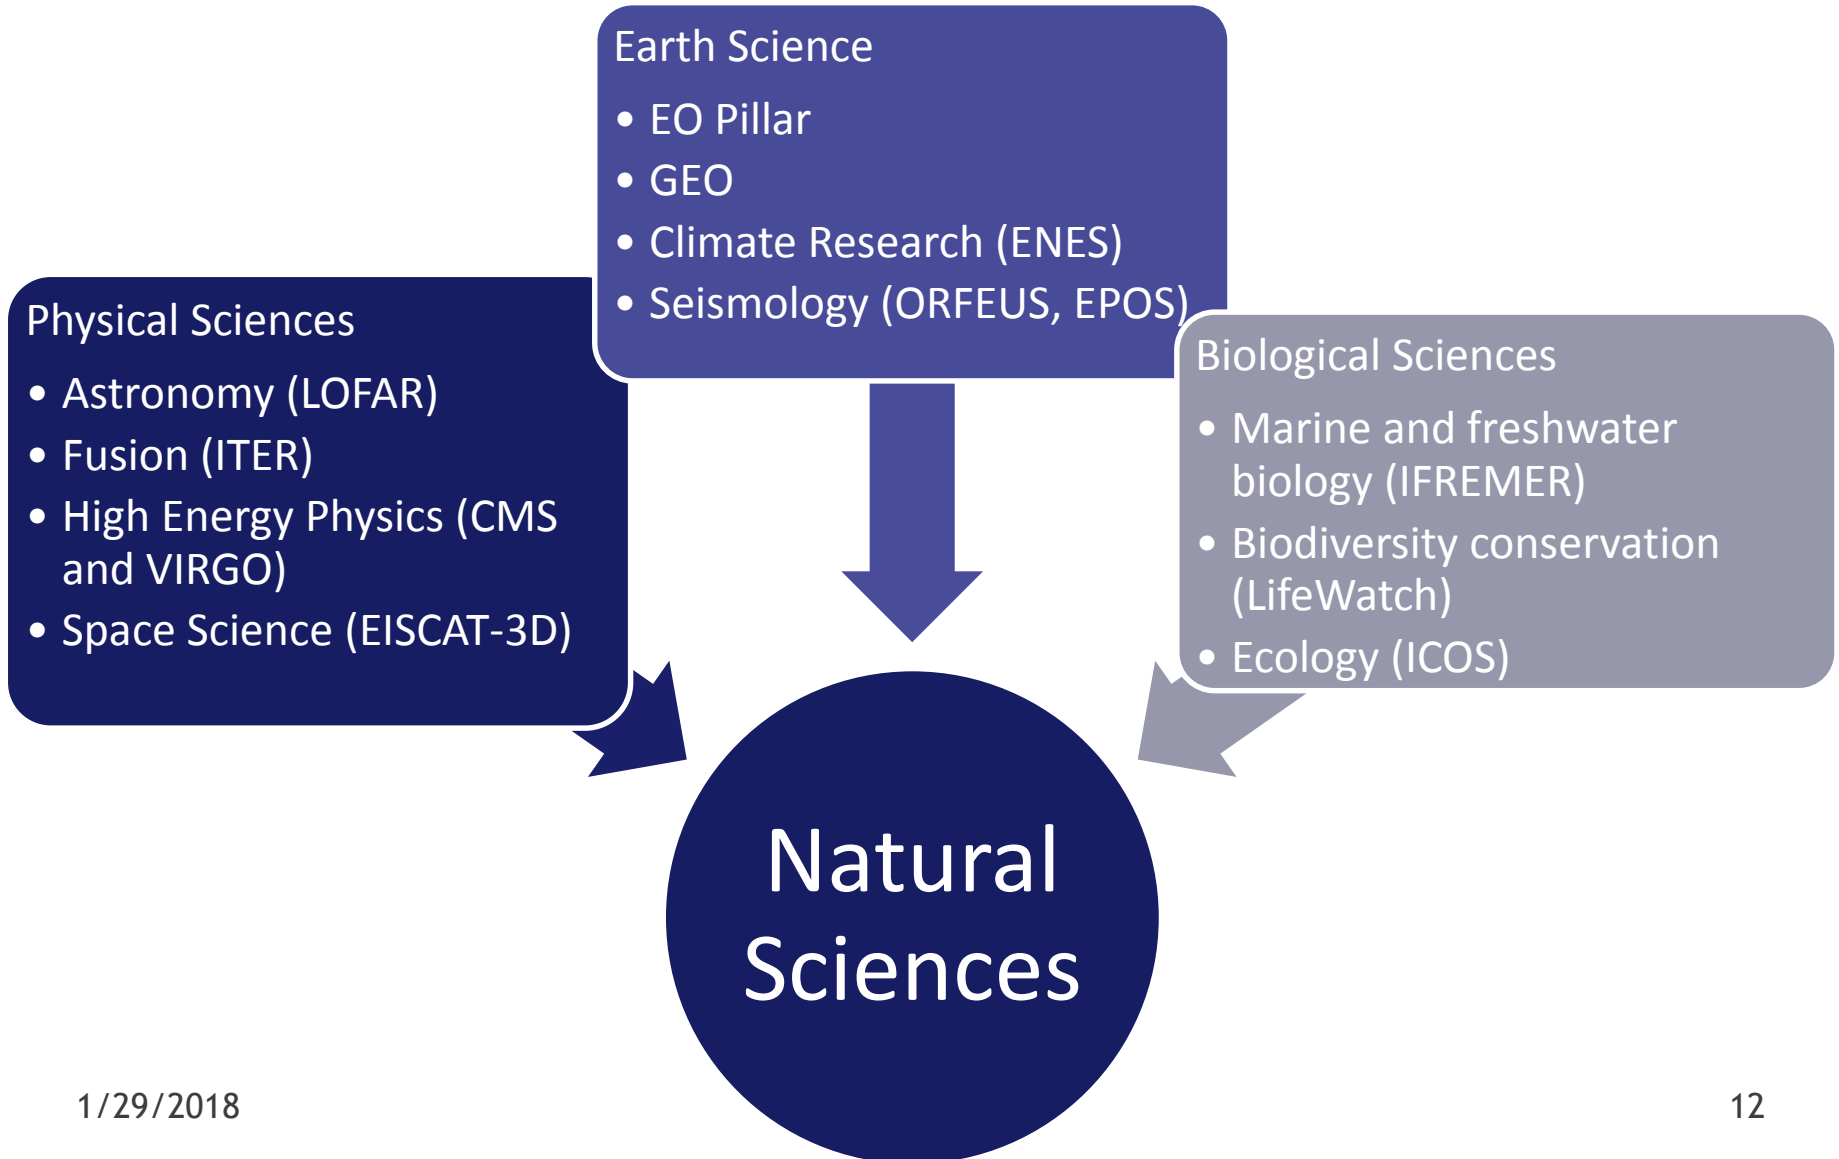

### Medical and Health Sciences

Biological  
Sciences  
(ELIXIR)

Structural  
biology  
(WeNMR)

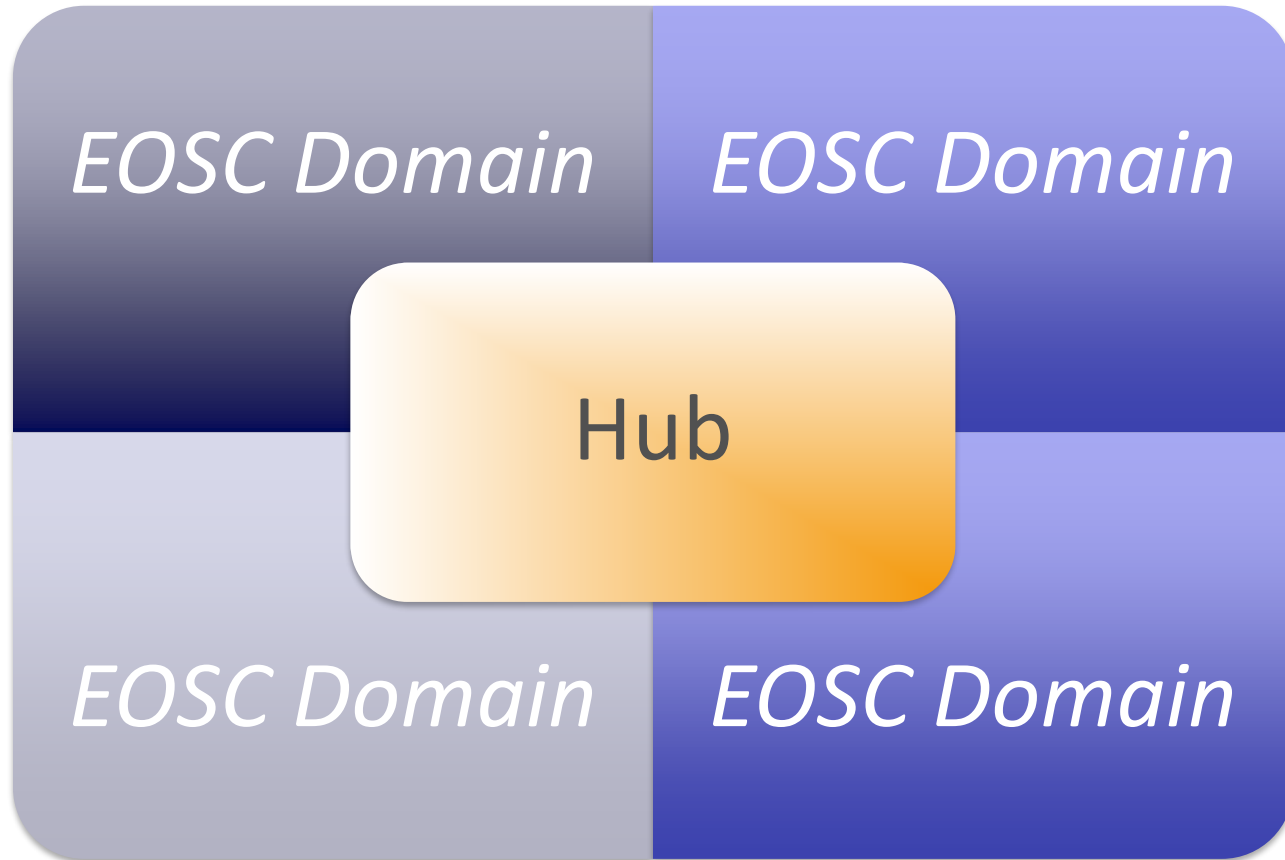

---

## Service Providers 2/2

---

## EOSC Domains and the Hub: what model?

---

## EOSC-hub Domain

- **Manages**
  - The internal governance, strategy and funding
  - The internal portfolio, policies and processes
- **Participates in the Hub with**
  - Resources and services as needed
    - Internally certified to comply to the Hub policies
  - Input to the EOSC standards roadmap and policies
  - Domain-specific FAIR implementation guidelines etc.
- **The Hub is governed as a Commons**

---

# Support to the Declaration: Governance and Funding

## EOSC-hub

- Provides an EOSC service integrator and federator.
- Develops the know-how and the prototype procurement and purchasing framework to acquire digital services from publicly funded infrastructures and commercial providers.

---

# Support to the Declaration: Data Culture and FAIR

## EOSC-hub

- Provides production-quality FAIR data and services through the participating Domains
- Ensures data can be used as widely as possible across scientific disciplines and between the private and public sector by
  - Making core data resources discoverable and accessible
  - Federating existing data infrastructures

---

# Support to the Declaration: Research Data Services and Architecture

## EOSC-hub

- Realizes a system of EOSC domains
- Delivers the Hub as a delivery channel of resources and services
- Improves skills and knowledge among researchers and service operators by delivering specialised trainings and co-design

---

## Impact 1/4

- *The operation of a federated European data and distributed computing infrastructure for research and education communities will optimise the access to IT equipment and services*
  - Creation of an EOSC-hub service portfolio, initially integrating EGI, EUDAT and INDIGO products
- *Establishing partnerships with industrial and private partners*
  - Joint Digital Innovation Hub

---

## Impact 2/4

- *Train people in research and academic organisations*
  - Training programme benefiting 20 research collaborations and external user groups
  - Common and other federated services, data management planning, federated services management, domain-specific trainings (bioinformatics, marine, radio astronomy, seismology, language, earth observation, structural biology, coastal analysis, climate, high-energy physics, arts and humanities)

---

## Impact 3/4

- *Avoid the locking-in to particular hardware or software platforms*
  - Increase service interoperability by exposing well-defined interfaces based on open specifications that improve reusability
  - Develop technical and service roadmaps to ensure a coherent evolution of the technical solutions and service offering

---

## Impact 4/4

- *More scientific communities will use storage and computing infrastructures with state-of-the-art services*
  - Expand the access to services outside the traditional user base through the virtual access mechanism
  - Stimulate engagement via Competence Centres in the following areas: life science, fusion, marine, radio astronomy, seismology, climate change, disaster mitigation

---

## Some Key Exploitable results

- Integration of common software and services for storage, compute and data
- Thematic services and Research Data
- Federation and collaboration service and tools (Marketplace, Accounting, Security, Helpdesk, Monitoring)
- Procedures and policies for federated service management
- Purchasing and procurement framework
- Training platform and materials
- Technical standards roadmap
- Strategy roadmap

---

## EOSC-hub and OpenAIRE-Advance

- EOSC-hub and OpenAIRE-Advance are complementary grants in EINFRA-12
  - Collaboration ag
  - External review panel in charge of monitoring the progress of the joint work plan and usage of services funded through virtual access/transnational access

---

## Public launch

- On Commission premises on 21 February 2018 in Brussels
- ‘ceremonial’ event by invitation, 15:00-17.30 with a networking cocktail afterwards
  - Joint event with OpenAIRE-Advance
- Waiting for the confirmation of the Commissioner **Mariya Gabriel** (Digital Economy and Society) and other high level speakers

---

## Events - 2018

- EOSC-hub week, Spring 2018 (April or May)
  - Internal project meetings with co-located public events and sessions
- Support to Digital Infrastructures 4 Research 2018
  - Conference-style event with call for participation, for promotion of project activities and results

---

## Useful links

- <http://go.egi.eu/EOSC-hub-doa>
- <http://go.egi.eu/EOSC-hub-budget>
- <https://confluence.egi.eu/display/EOSC/Home>
- Links are temporary, work space and collaborating tools hosted by a project-dedicated domain are being set-up

---

# Summary

## EOSC-hub will

- Create and providing the Hub as federated integration and management system for the future EOSC
- Implement the Hub as open community-lead framework
- Provide a wide range of services from many major digital infrastructures and research communities
