

Solar Energetic Particles, Solar Modulation and Space Radiation: New opportunities in the AMS Era #3

Monday 23 April 2018 - Thursday 26 April 2018

Washington DC

Scientific Programme

The workshop aims to bring together experts in the field of cosmic rays and solar energetic particles with an additional focus on their propagation inside the heliosphere and their interaction with the magnetosphere. The talks will present the most recent results related to solar energetic particles (SEPs), solar modulation, space radiation and related phenomena.
