

Studies of X Y Z states at BESIII

Saturday 7 July 2018 14:20 (15 minutes)

With about $12 fb^{-1}$ of collected data useful for the study of XYZ resonances, BESIII continues the exploration of these exotic charmonium-like states. In these talk, recent results of the measurements of the line-shape of $e^+e^- \rightarrow \pi^0\pi^0\psi(3686)$, KKJ/ψ , and $\pi^+D^0D^{*-}$, as well as the J^P determination of $Z_c(3900)$ and $Z_c(3900)$ observed in $e^+e^- \rightarrow \phi\chi_{c1/2}$ at $\sqrt{s} = 4.6$ GeV will be presented.

Authors: BESIII COLLABORATION; WANG, Bin (Chinese Academy of Sciences (CN))

Presenter: WANG, Bin (Chinese Academy of Sciences (CN))

Session Classification: Strong Interactions and Hadron Physics

Track Classification: Strong Interactions and Hadron Physics
