

Lattice Design of the CEPC Collider Ring for the Conceptual Design Report

Friday, July 6, 2018 8:15 PM (15 minutes)

CEPC is the future Circular Electron and Positron Collider proposed by China to mainly study the Higgs boson. This paper will present the beam optics design of the collider ring for the concept design report. The compatible beam optics for W and Z mode will be presented as well.

Primary authors: WANG, Yiwei; ZHANG, Yuan; WEI, Yuanyuan (Chinese Academy of Sciences (CN)); YU, Chenghui (IHEP); GAO, Jie (Institute of High Energy Physics, China)

Presenter: LEVICHEV, Evgeny (Budker Institute of Nuclear Physics (RU))

Session Classification: POSTER

Track Classification: Accelerator: Physics, Performance, and R&D for Future Facilities
