

The latest results of the measurement of the Higgs boson decaying to bottom quarks pair at CMS

Thursday 5 July 2018 09:00 (15 minutes)

The latest results of the measurement of the Higgs boson decaying to bottom quark pair will be presented. The analysis is performed using data collected with the CMS experiment in 2016 and 2017 at the LHC from pp collisions at centre-of-mass energies of 13 TeV.
