

EW physics at LHCb

Friday, July 6, 2018 5:30 PM (15 minutes)

A variety of vector boson measurements have been performed at LHCb with Run 1 data, including inclusive Z/W cross-sections, the Z forward-backward asymmetry, Z/W production with jets (including heavy flavor). Additionally, the inclusive Z cross-sections have been measured with Run 2 data. A variety of these results will be presented.

Presenter: KROKOVNY, Pavel (Budker Institute of Nuclear Physics (RU))

Session Classification: Top Quark and Electroweak Physics

Track Classification: Top Quark and Electroweak Physics
