

Rare Charm decays at LHCb

Saturday, July 7, 2018 9:40 AM (20 minutes)

LHCb is playing a crucial role in the study of rare and forbidden decays of charm hadrons, which might reveal effects beyond the Standard Model. New searches for FCNC mediated processes and first asymmetry measurements in multibody final states with two leptons are presented.

Presenter: MARINO, Pietro (EPFL - Ecole Polytechnique Federale Lausanne (CH))

Session Classification: Quark and Lepton Flavor Physics
