

Mass Production of GEM foils in Korea

Friday 6 July 2018 17:30 (30 minutes)

MECARO has invested great efforts to produce the large size GEM foils since 2012. The company developed their original production methods including new chemicals for etching and high-tech lithography machine. In this talk, we will overview the current status for the large size GEM foil production and review our future plan.

Presenter: PARK, Inkyu (University of Seoul, Department of Physics (KR))

Session Classification: Technology Applications and Industrial Opportunities
