

# Techlab for Machine Learning

A.K.A. “We have GPUs!”

# Overview

- **About Techlab**
- **GPU panel**
- **Software configuration & support**
- **ML & benchmarking**
- **Going forward**

# About Techlab (I)

- Diverse and cutting-edge HW
- Test and benchmarking
- Freely available to HEP people
- Best effort support

# About Techlab (II)

- **CPU arch**

- POWER8
- ARM
- X86 (Xeon Phi)

- **FPGA**

- Intel Arria 10

- **GPU**

- Nvidia
- AMD

# About Techlab (III)

- **Requirement:**

- Serves the experiments
- Will go production
- Actual decision made from HW testing

- **Get access:**

- Go to our Twiki:  
<https://twiki.cern.ch/twiki/bin/viewauth/IT/TechLab>  
(request access through a SNOW ticket, everything is explained and linked to in the Twiki)

# GPU panel overview

- **Nvidia**
  - Enterprise
    - Tesla K20
    - Tesla P100
  - Consumer
    - GTX 1080
    - GTX 1080 Ti
- **AMD**
  - Enterprise
    - Firepro w8100
    - Vega Frontier Edition

# Nvidia Tesla P100

- **System**

- Dual socket E5-2630 v4  
@ 2.2GHz
- 64GB RAM
- CC7.4
- Cuda 8.0

- **GPU**

- Pascal
- 10.6TFlops SP
- Half-precision
- 16GB

# Nvidia GTX 1080

- **System**

- Dual socket E5-2640 v4  
@ 2.40GHz
- 256GB
- CC7.4
- Cuda 8.0
- 4 GTX 1080

- **GPU**

- Pascal
- 9 Tflops SP
- 8GB GDDR5X

# Nvidia GTX 1080Ti

- **System**

- Dual socket E5-2640 v4 @ 2.40GHz
- 256GB
- CC7.4
- Cuda 9.0
- 3 chassis
- 4 GTX 1080Ti per system

- **GPU**

- Pascal
- 11.3 Tflops SP
- 11GB GDDR5X

# AMD Vega Frontier Edition

- **System**

- Dual socket Silver 4110 @ 2.10GHz
- 64GB RAM
- Ubuntu 16.04 LTS
- OpenCL & AMD rocm
- 2 systems
- 1 GPU per system

- **GPU**

- Vega
- 26.2TFlops SP
- 16GB

# Software configuration (I)

- **Mostly CentOS (CC7.x)**
- **CUDA and OpenCL**
- **Some common ML frameworks**
  - Tensorflow
  - Torch
  - Theano
  - (Keras)
- **Cluster with SLURM**

# Software configuration (II)

- **CERN ecosystem:**
  - Puppet
  - AFS
- **Based on user demand**

# ML & Benchmarking (I)

- Benchmarking necessary for procurement
- GPU benchmarking TBD  
(like HS06 for CPUs)
- ML big part of GPU usage at Techlab

==> Hence, ML code samples from people doing actual work are quite useful!

# ML & Benchmarking (II)

- **HEPiX Benchmarking WG**
  - <https://www.hepix.org/e10227/e10327/e10325>

# Going forward

- Steering committee
- In the cloud?
- If possible, GPU playground

# Thank you for your attention
