

School42 and Almerys Joint Educational Meeting. Blockchain technologies, Security and Data Handling

Monday 11 December 2017 - Monday 11 December 2017

CERN

Scientific Programme

Blockchain in Healthcare

Presentations in this block will focus on possible uses of Blockchain Technologies in the field of Healthcare.

Sensitive Data Handling and Management

Presentations will focus on the possible challenges of Data Handling in the field of Healthcare, as patient data is always a sensitive one. Students will present current challenges and possible solutions to them especially facing the GDPR kicking in next year.

Digital Identities and Security

Sensitive Data leads to the challenges in Digital and Cyber-security field to make sure the systems in the background are safe and unbreakable. Presentations in this track will focus on the possible ways of dealing with these issues and ways to fight the fraud in healthcare.
