ESR 04 - Vanessa Wyrwoll

RADSAGA Training Workshop – March 2018

Why Outreach?

- engaging large audience
- bringing knowledge to general public
- showing very simple what happens to tax money in RADSAGA

What to transfer?

S/pace
Satellites,
Space Station,
Missions

Rad/iation
RADSAGA is an Innovative Training Network under the Marie Skłodowska-Curie Actions. We will bring together industry, universities, laboratories and test-facilities in order to innovate and train young scientists and engineers in all aspects related to electronics exposed to radiation.

Main Question and Idea

- What can RADSAGA contribute to the daily life of everyone?
- Short cartoon movie
- Three scences
- keep it simple

Copyright ESA

Description

1. man gets into his car (singing a song) and enters a destination into his GPS and starts to drive -> continues driving
 2. a girl gets into a plane and starts using her laptop during the flight and listens to music with headphones
 3. astronaut in space e.g. on the ISS
- All three scenes recognizing a problem

Description

- Transition to explanation scene using voice over: Explanation that the solar event caused all three incidents
 1. Astronaut sees the effects
 2. Girl in the plane
 3. Man in the car
- To show how the impact on the different levels (space, avionics and ground)
- Simultaneously explaining the novel effects

Thank you for your attention!
