

Second international workshop on Collectivity in Small Collision Systems (CSCS2018)

Wednesday 13 June 2018 - Friday 15 June 2018

Wuhan, China

Book of Abstracts

Contents

Opening talk	1
Small system physics from ATLAS	1
Small System Physics and ALICE in China	1
Small system from CMS with heavy flavor and more	1
Small system physics from PHENIX	1
Small System Physics from LHCb	1
Small system physics from STAR	1
Round table discussion and experimental and theoretical approaches of flow in small systems	2
Collectivity in small system from PHENIX	2
Study Collectivity in Small System with multi-particle cumulants	2
Long-range angular correlations of charged particles in high multiplicity e+e- collisions	2
Anisotropy from low density scattering	2
Theory: superSONIC and more	2
Theory: AMPT and more	2
Theory: IP-Glasma and more	3
Theory: iEBE-VISHNU	3
Theory: Global Bayesian Analysis	3
Flow coefficient of identified particles in large and small systems	3
Azimuthal correlations of Heavy-flavor decay muon at the LHC	3
Multiplicity in large and small systems	3
Upper bound of hydrodynamic fluctuations in multiplicities	3
Deep learning and more in large and small systems	4
Particle production in small systems	4

Deep learning for large and small systems	4
Closing	4
Theoretical Summary	4
Strangeness enhancement from dynamical initialization with core-corona picture	4
Strangeness enhance from PACIAE	4
Long-range two-particle correlations	5
Longitudinal fluctuations and decorrelations of anisotropic flow	5
Longitudinal fluctuations and decorrelations of anisotropic flow	5

Session I / 6

Opening talk

Corresponding Authors: shiss@mail.ccnu.edu.cn, you.zhou@cern.ch

Session I / 7

Small system physics from ATLAS

Corresponding Author: jjia@bnl.gov

Session II / 8

Small System Physics and ALICE in China

Corresponding Author: daicui.zhou@cern.ch

Session II / 9

Small system from CMS with heavy flavor and more

Corresponding Author: wei.xie@cern.ch

Session III / 10

Small system physics from PHENIX

Corresponding Author: carlos.eugenio.perez.lara@cern.ch

Session III / 11

Small System Physics from LHCb

Corresponding Author: zhux@tsinghua.edu.cn

Session IV / 12

Small system physics from STAR

Corresponding Author: l.yi@yale.edu

Session IV / 13

Round table discussion and experimental and theoretical approaches of flow in small systems

Corresponding Author: roy.lacey@stonybrook.edu

Session V / 14

Collectivity in small system from PHENIX

Corresponding Author: r.belmont@cern.ch

Session V / 15

Study Collectivity in Small System with multi-particle cumulants

Corresponding Author: katarina.gajdosova@cern.ch

Session VI / 16

Long-range angular correlations of charged particles in high multiplicity e+e- collisions

Corresponding Author: yen-jie.lee@cern.ch

Session VI / 17

Anisotropy from low density scattering

Corresponding Author: f.wang@cern.ch

Session VII / 18

Theory: superSONIC and more

Corresponding Author: rweiler@mit.edu

Session VII / 19

Theory: AMPT and more

Corresponding Author: glma@sinap.ac.cn

Session VIII / 20

Theory: IP-Glasma and more

Corresponding Author: chunshen1987@gmail.com

Session VIII / 21

Theory: iEBE-VISHNU

Corresponding Author: 1501110084@pku.edu.cn

Session VIII / 22

Theory: Global Bayesian Analysis

Corresponding Author: wk42@phy.duke.edu

Session IX / 23

Flow coefficient of identified particles in large and small systems

Corresponding Author: redmer.alexander.bertens@cern.ch

Session IX / 24

Azimuthal correlations of Heavy-flavor decay muon at the LHC

Corresponding Author: xiaoming.zhang@cern.ch

Session X / 25

Multiplicity in large and small systems

Corresponding Author: christian.holm.christensen@cern.ch

Session X / 26

Upper bound of hydrodynamic fluctuations in multiplicities

Corresponding Author: myoga.murase@gmail.com

Session XI / 27

Deep learning and more in large and small systems

Corresponding Author: huichaosong@gmail.com

Session XI / 28

Particle production in small systems

Corresponding Author: vytautas.vislavicius@cern.ch

Session XII / 29

Deep learning for large and small systems

Corresponding Author: huichaosong@gmail.com

Session XII / 30

Closing

Session XII / 31

Theoretical Summary

Session XI / 32

Strangeness enhancement from dynamical initialization with core-corona picture

Corresponding Author: y-kanakubo-75t@eagle.sophia.ac.jp

Session XI / 33

Strangeness enhance from PACIAE

Corresponding Author: liangzhphy@gmail.com

Session XII / 34

Long-range two-particle correlations

Corresponding Author: yuko.sekiguchi@cern.ch

35

Longitudinal fluctuations and decorrelations of anisotropic flow

Corresponding Author: xiangyuwu@mails.ccnu.edu.cn

Session X / 36

Longitudinal fluctuations and decorrelations of anisotropic flow

Corresponding Author: xiangyuwu@mails.ccnu.edu.cn
