Cloud Computing at Microsoft and Venus-C

Thursday 15 April 2010 11:00 (20 minutes)

Detailed analysis

Cloud computing is an emerging new approach to distributed computing. Microsoft has developed a new Cloud computing platform named Azure. The talk will describe the overall Cloud Computing strategy and current plans for Microsoft Research collaboration in Europe within the EU project Venus-C, submitted to the recent FP7 call for proposal.

Presenter: Dr GAGLIARDI, Fabrizio (Microsoft Research)

Session Classification: Closing Plenary
