Belle II Software Framework - Overview, Feedback and Requests

Wednesday 12 September 2018 15:45 (15 minutes)

This talk will give a short overview over the Belle II Software Framework and its use in offline and online data processing. It will highlight the use of ROOT for data storage and inter-process communication as well as our Python 3 integration and user interface. Finally we will present some feedback and requests, primarily from the offline side.
