New Deep Learning Tools in ROOT/TMVA

Thursday, September 13, 2018 9:00 AM (15 minutes)

In this talk, we will describe the latest additions to the Toolkit for Multivariate Analysis (TMVA), the machine learning package integrated into the ROOT framework. In particular, we will focus on the new deep learning module that contains robust fully-connected, convolutional and recurrent deep neural networks implemented on CPU and GPU architectures. We will present performance of these new libraries on benchmark datasets from high-energy physics.

We will show also performance comparisons with respect to other machine learning frameworks, such as Tensorflow and Keras.
