

**LCMAPS**

**OSG AHM 2018**

# Need To Provide Defaults

- The current default mappings from OSG are not appropriate for Tier2's
- We need to provide an update for OSG to distribute
- Sites can override

# Priority Accounts

- `"/atlas/*Role=production" usatlas1`
  - Pilots, accepts any ATLAS group
- `"/atlas/*Role=software" usatlas2`
  - Software not used often anymore, but still map
- `"/atlas/*Role=lcgadmin" usatlas2`
  - SAM testing, Give higher priority

# Default Account(s)

- `"/atlas/*" usatlas3`

- Map default user to an ATLAS account
- Probably not an issue at Tier2
- Issue at BNL's shared Tier3
