

Education, Communication and Outreach at CERN

Ana Godinho
ECO Group Leader

Why ?

- **Awareness** about CERN and its activities
- **Commitment** to explain general public what we do and why
- **Support** for CERN from decision makers
- **Engagement** with the general public
- **Education** and inspiration for schools and teachers

Audiences

Media,
Governments

Press Office, Publications,
Web, Social Media, VIP Visits

Teachers

Teacher Programmes
Teaching Resources

Schools

Students Programmes
S'Cool Lab
Virtual Visits

General Public
(local and global)

Guided Tours
Exhibitions at CERN
Travelling exhibitions
Special events (fairs, science
museums, arts, local events etc.)

Photography and Video,
Graphic Design

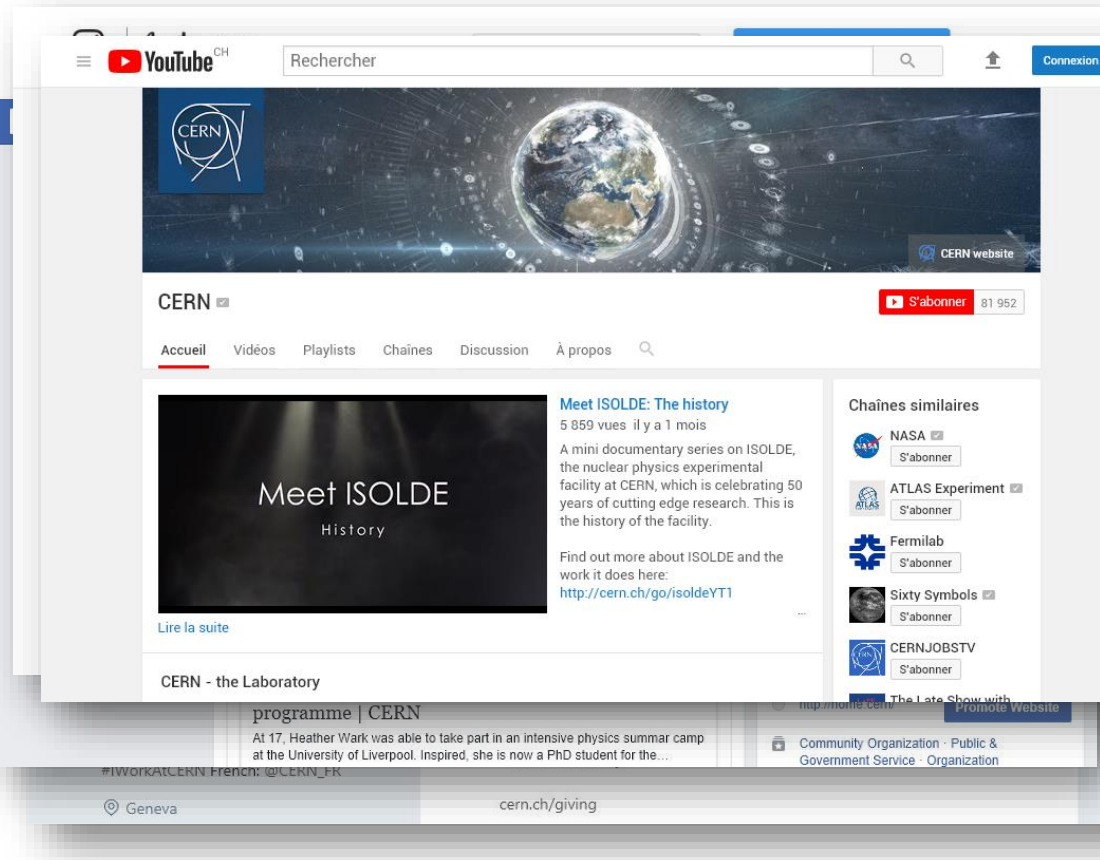

Communication with scientific community

- CERN community
- Scientific community
- Member States

Communication via social media

- Twitter 2.6million
- Facebook 655k
- Instagram 275k
- YouTube 86k

The image shows a screenshot of the CERN YouTube channel page. The channel name is 'CERN' with 81,952 subscribers. The featured video is 'Meet ISOLDE: The history', which has 5,859 views from the past month. The video description mentions a mini documentary series on ISOLDE, the nuclear physics experimental facility at CERN, celebrating its 50th anniversary. The video thumbnail shows the text 'Meet ISOLDE History' on a dark background. The page also features a 'Chaines similaires' (Similar Channels) section with links to NASA, ATLAS Experiment, Fermilab, Sixty Symbols, and CERNJOBSTV. At the bottom, there is a navigation bar with 'Geneva' and 'cern.ch/giving'.

Communication via media, TV, movies

- Media (Print, Televisions, Radio, Online)
- Movies
- Documentaries
- TV Shows

Communication with decision-makers and influencers

- Protocol
- VIP Visits
- Stars...

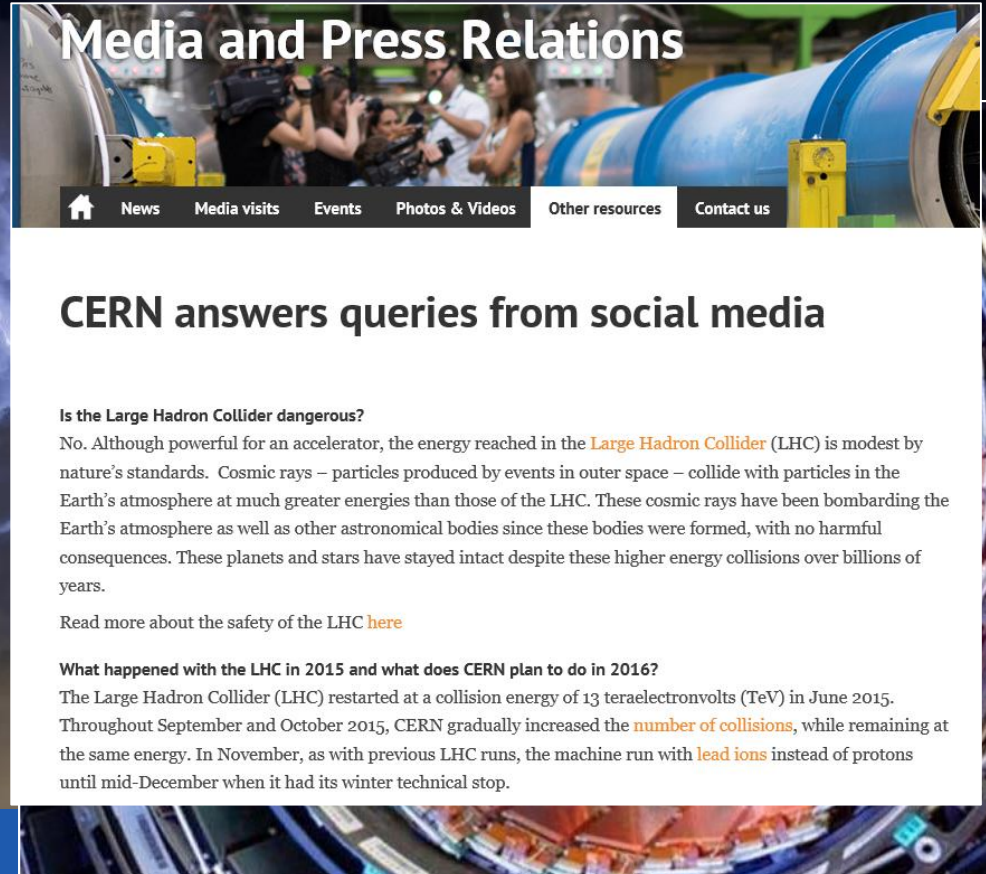

We have great stories to tell

Sometimes others have great stories about us too

We engage with those stories

CERN answers queries from social media

Is the Large Hadron Collider dangerous?

No. Although powerful for an accelerator, the energy reached in the **Large Hadron Collider** (LHC) is modest by nature's standards. Cosmic rays – particles produced by events in outer space – collide with particles in the Earth's atmosphere at much greater energies than those of the LHC. These cosmic rays have been bombarding the Earth's atmosphere as well as other astronomical bodies since these bodies were formed, with no harmful consequences. These planets and stars have stayed intact despite these higher energy collisions over billions of years.

Read more about the safety of the LHC [here](#)

What happened with the LHC in 2015 and what does CERN plan to do in 2016?

The Large Hadron Collider (LHC) restarted at a collision energy of 13 teraelectronvolts (TeV) in June 2015. Throughout September and October 2015, CERN gradually increased the **number of collisions**, while remaining at the same energy. In November, as with previous LHC runs, the machine run with **lead ions** instead of protons until mid-December when it had its winter technical stop.

Movement capture

Graphic Design

- Logos
- Posters
- Letterheads
- Templates
- Schemas
- Etc...
- Check guidelines
cern.ch/design-guidelines

Clear space

Clear space is the area surrounding the logo that must be kept free of other graphic elements. The minimum required clear space is defined by the measurement "X" as shown. This measurement is equal to 1/4 of the width of the logo.

Teachers and schools

- Teachers programmes
952 teachers in 2017
- S'Cool LAB
7 200 students in 2017
- Masterclasses
10 000 students in 2017
- Students programmes
1 600 students in 2017

Exhibitions

- **Travelling**
LHC Interactive Tunnel
Accelerating Science
>500 000 visitors
16 countries
- **Permanent**
Microcosm
Universe of Particle

Guided Tours

- Huge demand
133 000 visitors in 2017
2x more requests...
50 countries
30 languages
- 40% schools
70% come from > 600km
- Volunteer guides
Staff, fellows, users...
We provide training

Events

- Local events
 - Public conferences
 - Arts@CERN
 - Researchers Night
 - TEDxCERN
 - CineGlobe
 - Automnales
- Remote events
 - Science fairs
 - Member States celebrations

We need you !
