

Phenomenology 2018 Symposium

Tuesday, 8 May 2018

Cosmology I - G-31 (14:00 - 16:00)

time	[id] title	presenter
14:00	[539] Anisotropies in the Gravitational Wave Background from Cosmological Phase Transitions	TSAI, Yuhsin
14:15	[567] Characterization of gravitational waves generated by hydromagnetic turbulence from the electroweak phase transition	ROPER POL, Alberto
14:30	[618] Multi-messenger Probes of New Physics: Dark Matter	TSAI, Yu-Dai
14:45	[472] Neutron Star Mergers Chirp About Vacuum Energy	RIGO, Gabriele
15:00	[501] leptogenesis in cosmological relaxation with particle production	Dr SON, Minho SON, Minho
15:15	[611] Electroweak Sphaleron with dimension-six operators	GAN, Xucheng
15:30	[617] Cosmological Quantum Backreaction	ZAGO, Fernando
15:45	[652] The Light Radion Window	LEE, Jun Seok
