

IDM 2018

Sunday, July 22, 2018 - Friday, July 27, 2018

MacMillian

Scientific Program

Theory

Any theory talk can use this general track. We will also provide specific theory tracks.

Astrophysics Dynamics

Cosmological measurements and evidence for dark matter through astrophysics dynamics measurements.

Direct Detection

Dark Matter direct detection experiments

Directional Detection

Detectors that are sensitive to dark matter particle direction.

Indirect Detection

Dark Matter indirect detection experiments including gamma ray, neutrino, cosmic rays detection experiments.

Particle Physics Searches

Includes accelerator-based searches for dark matter.

Neutrino Physics

Underground Labs

Low Background Techniques

Specific talks on low radioactive background techniques.

Plenary
