

ATLAS strategy for the reinterpretation of BSM analyses

Monday 14 May 2018 09:45 (25 minutes)

Over the past years, ATLAS has developed a well defined approach to ease the reinterpretation of the results of BSM analyses. I will review the key points of this strategy, with emphasis on the auxiliary material that the collaboration is making available to the particle physics community (excluding long-lived particles which will be discussed in dedicated talks).

Presenter: VIVARELLI, Iacopo (University of Sussex (GB))

Session Classification: BSM searches
