TrackML

May 23, 2018
Adriano Di Florio, Adrian Pol, Cesare Calabria, Valentin Volkl
So far....

- **Investigate performance of CMS reco algorithms using Vincenzo's notebook**
  - **areAlignedRZ**
  - **haveSimilarCurvature**
- **Interface TrackML with TrickTrack**
  - **Python wrapper for convenience**
  - **https://github.com/vvolkl/TrickTrack/blob/TrackML/python/TrackML_example.py**
  - **Seems very slow! Starts to swap even for fraction of the event**
  - **Start investigation with doublet creation**

Next!

- Define layer graph

- Improve on geometric Filters
- Test Submission
