

# Large Scale NN Training

Vladimir Loncar, Thong Nguyen, Sofia Vallecora,  
Jean-Roch Vlimant

# What happened

and will happen

- Jean-Roch:
  - Refactorizing the code to put more than 1 nodes per worker
  - Prepare for horovod integration
- Vladimir:
  - Debugging the issue (multi-master running slower than single master) with profiling tool TAU
  - Understand the MPI communication in-depth.
- Thong
  - Implemented the dummy Keras wrapper for PyTorch model
  - Make sure the algorithm work in pytorch with this keras interface
