

CERN (15th IPPOG Meeting)

Slovenia New IPPOG member

Czech Republic New IPPOG member

Key points – Cosmic Ray

The group had its kick off meeting and is looking forward to a call in September, just in time for when Carolin is getting ready for the International Cosmic Ray Day

<https://icd.desy.de/>

Key points – Working Groups

Masterclasses: Evolved the strategies to approach new countries and institutions

Physics for lay audience: Plans to get in contact with the European Strategy with the goal to participate in the communication strategy

Exhibits: The mix of diverse backgrounds and enthusiasm for exhibits will surely lead to some creative new ideas. The focus is set the framework that allows it to happen

Key points - Panels

Broadening the scope of masterclasses: Great ideas to expand content and the challenge to understand and explore the masterclasses' concept further

Diversity: Developed a message that outreachers should acknowledge that “capital science” at early age is important to build diversity in science for the long run

Communication platforms: Will aim to provide a database to help teachers and “Outreachers” on their job to promote particle physics

Thank you!

A big Thank You to the team of EGO, INFN and Pisa University to make this 15th IPPOG meeting possible!

Physics Department University of Pisa: Massimiliano Razzano

Ettore Vicari (director) and Lucia Lilli and Lorella Lorenzin (secretaries). Also Francesco Fidecaro who wasn't involved in the organization at all but brilliantly help us setup the Vidyo connection on Thursday!

INFN Headquarters and Pisa: Catia Peduto and Giancarlo Cella

EGO: Nicolas Arnaud and Severine P erus

Stavros Katsanevas (EGO director), Jo van den Brand (Virgo Spokesperson) and Valerio Boschi and Irene Fiori (guides)
