Publications

Statistics

CLICdp documents since October 2013 (based on CDS)

Туре	2013 Oct-Dec	2014	2015	2016	2017	2018
Note	0	5	4	5	7	1
Conf	6	9	8	17	20	5
Pub	0	0	4	2	3	3
Total public	6	14	16	24	30	9
Drafts	6	20	20	25	28	11

Publications

Statistics

CLICdp public notes, all categories, to August 2018:

Collaborative Editing

Overleaf

- CERN has Overleaf 'Pro' licence, allows full history/version tools
- Online via web interface, or synch'd to Dropbox/github for local editing; possible to git clone/remote from gitlab.
- Two main uses:
 - co-authoring (consider for any of the forthcoming papers?)
 - reviewing drafts
- \bullet (My) Initial experience of concurrent editing (\sim 15 student authors, simultaneous) very good
- Potential to improve co-authoring and reviewing of papers
- Propose we have test phase to gain experience: when authors submitting version to PubCom, we will offer use of Overleaf
- Circulate .pdf via CDS as usual for now
- In contact with CERN Authoring service about workflow, managing templates, etc.

Collaborative Editing: sharing

Collaborative Editing: accept/reject edits

Collaborative Editing: commenting

Collaborative Editing: revision history/tagging versions

Proceedings

General reminder

Please try to submit proceedings for conferences, even if brief.

- Can often obtain an extension on deadlines by contacting organisers to work around competing demands on time.
- Reviewing of proceedings should be limited to correcting mistakes and ambiguities, not changing style/rewriting.

Procedures

Submitting the paper

Procedures described

http://clicdp.web.cern.ch/content/hints-and-tips
some duplication with Twiki pages - will remove one or the other
To add "checklist" for publications

Normal Collaboration review takes (Annex 4 of MoC):

- 2 weeks for journal paper
- 2 weeks for public notes
- 1 week for conference proceedings

Drafts under review are listed on twiki:

https://twiki.cern.ch/twiki/bin/view/CLIC/CLICdpNotesForCollaborationReview

Please allow up to one week for initial review, implementation of changes and final checks before circulation

Guidelines

Formatting the paper

Reference versions of CLICdp templates maintained in gitlab:

```
https://gitlab.cern.ch/CLICdp/Publications/Templates/
Style/tree/master/CLICdpTemplate
```

Check for updates before starting a new paper.

Plan to make available as templates in Overleaf (trivial, e.g. as demo https://v2.overleaf.com/read/sfbtsbsmpyvj

Plots Use CLICdp style, where possible:

```
https://gitlab.cern.ch/CLICdp/Publications/Templates/
Style/tree/master/CLICdpStyle
```

with "CLICdp" (or "CLICdp preliminary") label in the plots.

Support

Role of PubCom

Please let us know, if you face any problems with:

- using CLICdp templates, root style, Overleaf, . . .
- submitting to arXiv,
- getting support/response from conference organizers,
- copyright issues.

We are here to help

- clicdp-pubcom@cern.ch
- https:
 - //mattermost.web.cern.ch/clicdp-pubcom/channels/pubcom

Conclusions

Congratulation to everyone for the productive year so far

Many thanks to official paper reviewers and all CLICdp members contributing to draft reviews

and colleagues of the PubCom past, present and new

A busy end of year ahead!

Backup slides

Copyrights

Open access license

- the CDS submissions were not copyright protected as "open access" publications
- with help of CDS support, new solution has been implemented: all public CDS submissions from CLICdp will be covered by CC-BY-4.0 license by default
- the cover page templates have been modified to include the following statement:
 - ©2018 CERN for the benefit of the CLICdp Collaboration.
- the majority of the HEP journals publish under open access.
 - Still, it is the responsibility of the author to make sure that this is the case and to inform the publications committee in case of the submission to a non open access journal.
