

# **NuInt 18 - 12th International Workshop on Neutrino-Nucleus Interactions in the Few-GeV Region**

Monday 15 October 2018 - Friday 19 October 2018

Gran Sasso Science Institute (GSSI)

## **Book of Abstracts**

# Contents

|  |   |
|--|---|
| Welcome . . . . .  | 1 |
| Neutrinos and Electroweak Nuclear Physics . . . . .  | 1 |
| The CERN neutrino platform . . . . .   | 1 |
| SBN . . . . .  | 1 |
| protoDUNE . . . . .  | 1 |
| DUNE near detector . . . . .   | 1 |
| T2K: Unfolding in Depth Methods and Motivation Talk . . . . .  | 1 |
| T2K: Forward Folding Issues and Ideas . . . . .  | 1 |
| T2K: NC $\nu$ -O Scattering in SK + SK Gd Prospects . . . . .  | 2 |
| T2K: CC $0\pi \nu + \bar{\nu}$ in the Tracker . . . . .  | 2 |
| T2K: CC $1\pi$ in the P0D . . . . .  | 2 |
| Wagasci/BabyMind . . . . .   | 2 |
| Neutrino induced meson production in the resonance region below 2 GeV . . . . .                        | 2 |
| Impact of FSI on neutrino-nucleon pion production cross sections from neutrino-deuteron data . . . . . | 2 |
| Angular distributions in electroweak pion production off nucleons . . . . .                            | 2 |
| GENIE v3 . . . . .   | 3 |
| GENIE: Physics Models in new Tunes . . . . .   | 3 |
| GENIE: New Tunes . . . . .   | 3 |
| NEUT . . . . .   | 3 |
| NUWRO . . . . .  | 3 |
| GiBUU . . . . .  | 3 |
| FLUKA . . . . .  | 3 |
| How Well are MINER $\nu$ A $1\pi$ Results Modeled? . . . . .   | 3 |

|  |   |
|--|---|
| MINER $\nu$ A Low-Recoil Tune and its Implications . . . . .   | 3 |
| CC0 $\pi$ in the Medium Energy Beam in MINER $\nu$ A . . . . .   | 4 |
| Transverse Kinematic Imbalance in Minerva: Past, Present, and Future . . . . .   | 4 |
| What Can MINER $\nu$ A Say about the EMC Effect? . . . . .   | 4 |
| MicroBooNE detector, modelling and performance . . . . .   | 4 |
| MicroBooNE charged-current inclusive cross section measurement . . . . .   | 4 |
| MicroBooNE charged-current neutral pion cross section measurement . . . . .  | 4 |
| MicroBooNE electron neutrino inclusive cross section . . . . .   | 4 |
| MicroBooNE charged-current analyses with final state protons . . . . .   | 4 |
| Coherent Elastic Neutrino Nucleus Scattering, and COHERENT results . . . . .   | 5 |
| report on COHERENT results . . . . .   | 5 |
| KDAR & ISODAR . . . . .  | 5 |
| Impact of cross section modelling on NO $\nu$ A oscillation analyses . . . . .   | 5 |
| Status and Results of Semi-exclusive scattering measurements in NO $\nu$ A . . . . .   | 5 |
| Status of Inclusive scattering measurements in NO $\nu$ A . . . . .  | 5 |
| Introduction to theoretical uncertainties . . . . .  | 5 |
| Lepton-nucleus cross sections within the CRPA approach . . . . .   | 6 |
| Comparison of lepton-nucleus scattering models in the QE region . . . . .  | 6 |
| Theoretical uncertainty of quasielastic neutrino cross sections from superscaling with relativistic effective mass . . . . . | 6 |
| Hadron Production Overview of Current and Future Projects . . . . .  | 6 |
| The T2K Flux Prediction . . . . .  | 6 |
| The DUNE Flux Prediction . . . . .   | 6 |
| MINER $\nu$ A Adventures in Flux \newline Determination . . . . .  | 6 |
| Status of ENUBET . . . . .   | 6 |
| Ab initio theoretical approaches . . . . .   | 7 |
| Relativistic Corrections within the Integral Transform Approach . . . . .  | 7 |
| SuSAv2-MEC analysis of recent T2K and MINER $\nu$ A measurements . . . . .   | 7 |
| Neutrino-nucleus reactions on oxygen and carbon for supernova neutrino detection . . . . .                                   | 7 |
| Detection of Supernova Neutrinos at SK . . . . .   | 7 |

|   |    |
|---|----|
| KDAR & ISODAR . . . . .   | 7  |
| JLab E12-14-012 Experiment . . . . .  | 7  |
| Electrons for Neutrinos . . . . .   | 7  |
| ArgoNeuT . . . . .  | 8  |
| LArIAT . . . . .  | 8  |
| ANNIE . . . . .   | 8  |
| NINJA . . . . .   | 8  |
| Hyper-Kamiokande/NuPRISM/TITUS . . . . .  | 8  |
| SBND . . . . .  | 8  |
| CAPTAIN . . . . .   | 8  |
| nuSTORM . . . . .   | 8  |
| Summary of the ECT* Workshop on Modeling Neutrino Interactions . . . . .                        | 8  |
| Summary of NuSTEC Workshop on Shallow- and Deep-Inelastic Neutrino-Nucleus Scattering . . . . . | 9  |
| Summary Talks . . . . .   | 9  |
| TBA . . . . .   | 9  |
| Summary Talks . . . . .   | 9  |
| Generators: Summary & Outlook . . . . .   | 9  |
| From low to high $Q^2$ : comparisons with preliminary results from JLab E04-001 . . . . .       | 9  |
| T2K parametrization and model development . . . . .   | 9  |
| ND280 Upgrade . . . . .   | 10 |
| T2K: NC $\nu$ -O Scattering in SK + SK Gd Prospects . . . . .                                   | 10 |
| T2K: CC $0\pi$ + CC $1\pi$ on-axis . . . . .  | 10 |
| ND280 Upgrade . . . . .   | 10 |
| Theory: Summary & Outlook . . . . .   | 10 |
| Experiments: Summary & Outlook . . . . .  | 10 |
| Announcement of NUINT 2020 . . . . .  | 10 |
| Closing . . . . .   | 10 |

**Monday / 25**

## **Welcome**

**Corresponding Author:** eugenio.coccia@lngs.infn.it

**Monday / 26**

## **Neutrinos and Electroweak Nuclear Physics**

**Monday / 27**

## **The CERN neutrino platform**

**Author:** Albert De Roeck<sup>None</sup>

**Corresponding Author:** albert.de.roeck@cern.ch

**Monday / 28**

## **SBN**

**Monday / 29**

## **protoDUNE**

**Corresponding Author:** roberto.acciarri@cern.ch

**Monday / 30**

## **DUNE near detector**

**Monday / 31**

## **T2K: Unfolding in Depth Methods and Motivation Talk**

**Monday / 32**

## **T2K: Forward Folding Issues and Ideas**

**Corresponding Author:** lukas.koch@stfc.ac.uk

Monday / 33

## **T2K: NC $\nu$ -O Scattering in SK + SK Gd Prospects**

Monday / 34

## **T2K: CC $0\pi$ $\nu + \bar{\nu}$ in the Tracker**

Monday / 35

## **T2K: CC $1\pi$ in the POD**

Monday / 36

## **Wagasci/BabyMind**

Monday / 37

## **Neutrino induced meson production in the resonance region below 2 GeV**

Monday / 38

## **Impact of FSI on neutrino-nucleon pion production cross sections from neutrino-deuteron data**

Monday / 39

## **Angular distributions in electroweak pion production off nucleons**

**Tuesday / 40**

**GENIE v3**

**Tuesday / 41**

**GENIE: Physics Models in new Tunes**

**Tuesday / 42**

**GENIE: New Tunes**

**Tuesday / 43**

**NEUT**

**Tuesday / 44**

**NUWRO**

**Tuesday / 45**

**GiBUU**

**Tuesday / 46**

**FLUKA**

**Tuesday / 47**

**How Well are MINER $\nu$ A  $1\pi$  Results Modeled?**

**Tuesday / 48**

## **MINER $\nu$ A Low-Recoil Tune and its Implications**

Tuesday / 49

## **CC0 $\pi$ in the Medium Energy Beam in MINER $\nu$ A**

Tuesday / 50

## **Transverse Kinematic Imbalance in Minerva: Past, Present, and Future**

Tuesday / 51

## **What Can MINER $\nu$ A Say about the EMC Effect?**

Tuesday / 52

## **MicroBooNE detector, modelling and performance**

Tuesday / 53

## **MicroBooNE charged-current inclusive cross section measurement**

Tuesday / 54

## **MicroBooNE charged-current neutral pion cross section measurement**

Tuesday / 55

## **MicroBooNE electron neutrino inclusive cross section**

Tuesday / 56

**MicroBooNE charged-current analyses with final state protons**

Wednesday / 57

**Coherent Elastic Neutrino Nucleus Scattering, and COHERENT results**

Wednesday / 58

**report on COHERENT results**

Wednesday / 59

**KDAR & ISODAR**

Wednesday / 60

**Impact of cross section modelling on  $\text{NO}\nu\text{A}$  oscillation analyses**

Wednesday / 61

**Status and Results of Semi-exclusive scattering measurements in  $\text{NO}\nu\text{A}$**

Wednesday / 62

**Status of Inclusive scattering measurements in  $\text{NO}\nu\text{A}$**

Wednesday / 63

**Introduction to theoretical uncertainties**

Wednesday / 64

## **Lepton-nucleus cross sections within the CRPA approach**

Wednesday / 65

## **Comparison of lepton-nucleus scattering models in the QE region**

Wednesday / 66

## **Theoretical uncertainty of quasielastic neutrino cross sections from superscaling with relativistic effective mass**

Wednesday / 67

## **Hadron Production Overview of Current and Future Projects**

Wednesday / 68

## **The T2K Flux Prediction**

Wednesday / 69

## **The DUNE Flux Prediction**

Wednesday / 70

## **MINER $\nu$ A Adventures in Flux \newline Determination**

Wednesday / 71

## **Status of ENUBET**

Thursday / 72

## **Ab initio theoretical approaches**

Thursday / 73

## **Relativistic Corrections within the Integral Transform Approach**

Thursday / 74

## **SuSAv2-MEC analysis of recent T2K and MINERvA measurements**

Thursday / 75

## **Neutrino-nucleus reactions on oxygen and carbon for supernova neutrino detection**

Thursday / 76

## **Detection of Supernova Neutrinos at SK**

Thursday / 77

## **KDAR & ISODAR**

Thursday / 78

## **JLab E12-14-012 Experiment**

Thursday / 79

## **Electrons for Neutrinos**

**Thursday / 80**

**ArgoNeuT**

**Thursday / 81**

**LArIAT**

**Thursday / 82**

**ANNIE**

**Thursday / 83**

**NINJA**

**Thursday / 84**

**Hyper-Kamiokande/NuPRISM/TITUS**

**Friday / 85**

**SBND**

**Friday / 86**

**CAPTAIN**

**Friday / 87**

**nuSTORM**

**Friday / 88**

## **Summary of the ECT\* Workshop on Modeling Neutrino Interactions**

Friday / 89

## **Summary of NuSTEC Workshop on Shallow- and Deep-Inelastic Neutrino-Nucleus Scattering**

Friday / 90

## **Summary Talks**

Friday / 91

**TBA**

Friday / 92

## **Summary Talks**

Friday / 93

## **Generators: Summary & Outlook**

Corresponding Author: hayato@icrr.u-tokyo.ac.jp

Thursday / 94

## **From low to high $Q^2$ : comparisons with preliminary results from JLab E04-001**

Monday / 95

## **T2K parametrization and model development**

**Monday / 96**

## **ND280 Upgrade**

**Thursday / 97**

## **T2K: NC $\nu$ -O Scattering in SK + SK Gd Prospects**

**Thursday / 98**

## **T2K: CC $0\pi$ + CC $1\pi$ on-axis**

**Friday / 99**

## **ND280 Upgrade**

**Friday / 100**

## **Theory: Summary & Outlook**

**Corresponding Author:** vishvas.pandey@cern.ch
