

PHENOEXP 2018: LHC Physics and beyond

Thursday, May 10, 2018

Working Group: QCD (2:30 PM - 3:45 PM)

-Conveners: Norberto Scoccola

time	[id] title	presenter
2:30 PM	[22] Strong magnetic fields in nonlocal chiral quark models	FLORENCIA IZZO VILLAFANE, María
2:40 PM	[28] Thermodynamic properties of finite systems at zero chemical potential within pNJL model	Dr GRUNFELD, Ana Gabriela
2:50 PM	[19] Charged pion masses under strong magnetic fields	COPPOLA, Máximo
3:00 PM	[23] Hadron-Quark phase transitions in Neutron Stars inner cores	CONTRERA, Gustavo
3:10 PM	[24] Quark Matter and its Role for the Core Compositions of Neutron Stars	Dr ORSARIA, Milva Gabriela
3:20 PM	[26] Time-dependent GL approach to the dynamics of inhomogeneous chiral condensates	CARLOMAGNO, Juan Pablo
3:30 PM	[29] Third family of compact stars within a nonlocal chiral quark model equation of state	Dr GRUNFELD, Ana Gabriela
