

Welcome to the 2nd International Workshop on Superconducting Magnet Test Facilities

The workshop chair:
Marta Bajko CERN

The scientific program committee :
Stoyan Stoynev (FNAL) , Toru Ogitsu (KEK), Roser Vallcorba (CEA) and Marta Bajko (CERN)

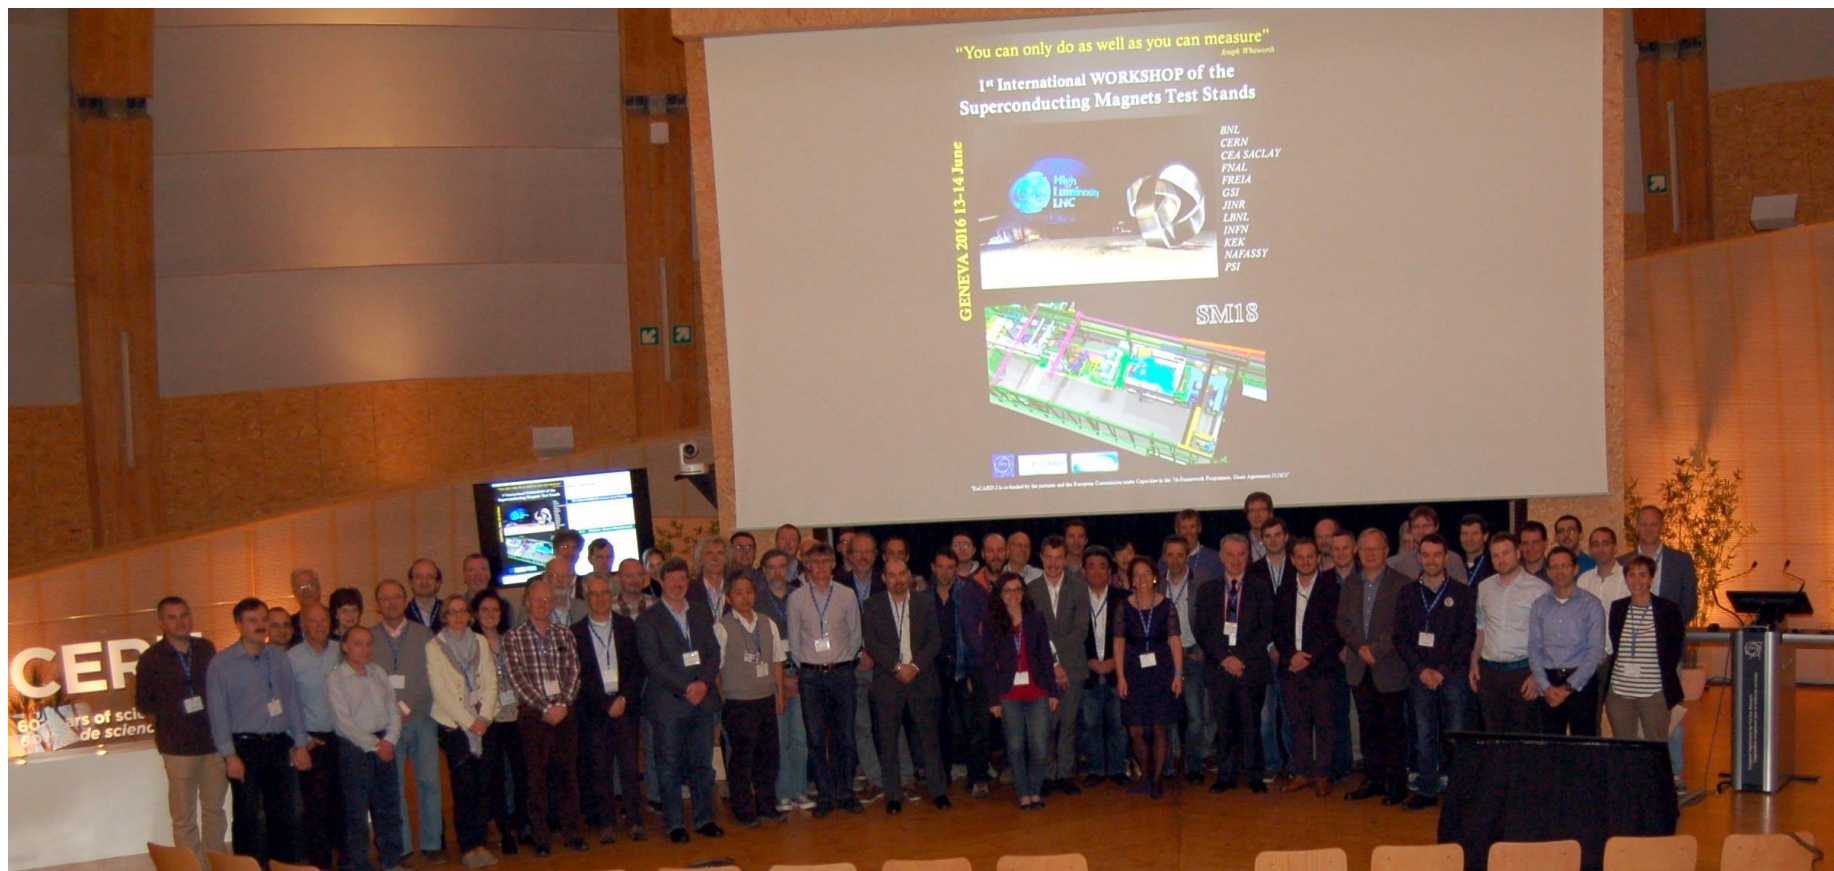

Program Chair :
Joseph Muratore (BNL)

Local organiser committee:

Peter Wanderer, Nina Rivera (BNL)

The 1st International workshop on superconducting magnet test facilities

The 2nd International workshop on superconducting magnet test facilities

Particular goals of this workshop is to present how in different test stands the **operation** (cryogenics, powering, interlocks) are done and what kind of **good practice** can be learned from each other to increase testing rates. **QA/QC tools that are developed** based on our needs will be presented.

After a **visit to BNL facility** we will come back to technical free discussion on the different sessions and decide together in which fields experience can and should be shared.

TRANS NATIONAL ACCESS OPEN @ CERN

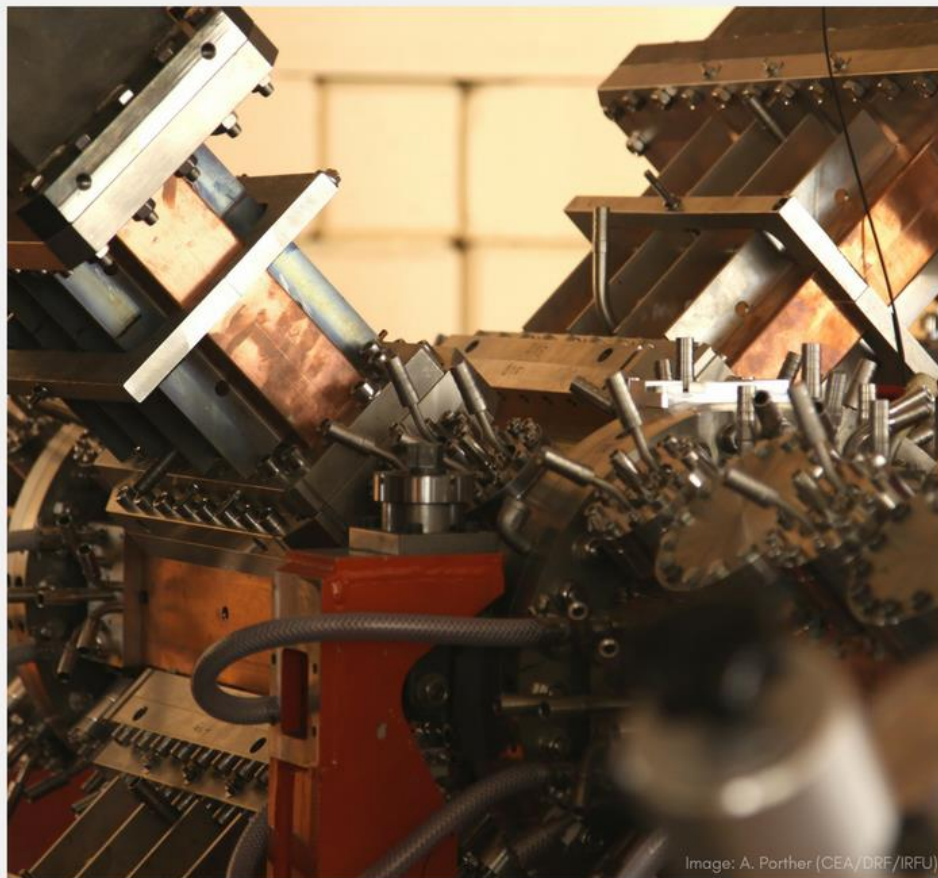

Image: A. Porther (CEA/DRF/IRFU)

TRANSNATIONAL ACCESS SCHEME

THE SCHEME

The ARIES project offers support (incl. reimbursement of travel & accommodation) to access 14 accelerator testing facilities across 5 European countries.

TESTING TYPES

- Material
- Magnet
- Electron & proton beam
- Radiofrequency
- Plasma beam

For further information and to apply, please contact the facility coordinators directly prior to completing a formal application.
