

# Dark Matter search activity at the University of Montreal

*Wednesday 18 July 2018 13:30 (15 minutes)*

A brief overview of experimental activities at the University of Montreal is given concerning the search for the Dark Matter (DM) in the PICO experiment (SNOLAB, Ontario, Canada) as well as at the accelerator laboratory in Montreal. Newly proposed methods of DM detection using the superheated liquid gas will be briefly discussed.
