

The 5th Korea Future Collider Study Group Meeting: "Current Status and Perspective"

In this meeting, we have a special guest, Michelangelo Mangano from CERN, who will talk about the perspective of the physics potential of the future colliders. There will be also a few talks from local speakers. And, most importantly, we plan to have a round table discussion, as well as having a plenty amount of time for discussion.

Date: 20 April 2018
