

Contents

| | |
|---|-----------|
| FCC Collaboration | 3 |
| Executive Summary | 5 |
| 1 Physics Opportunities and Reach | 11 |
| 1.1 Requirements and Opportunities | 11 |
| 1.2 Standard Model Processes | 11 |
| 1.3 Higgs and EW Symmetry Breaking | 11 |
| 1.4 Beyond the Standard Model Phenomena | 11 |
| 1.5 Physics with Heavy Ions | 11 |
| 1.6 Lepton-Hadron Physics | 11 |
| 1.7 Physics Opportunities with Injectors | 11 |
| 2 Collider Design and Performance | 13 |
| 2.1 Requirements and Design Considerations | 13 |
| 2.2 Parameter Choices | 13 |
| 2.3 Design Challenges and Approaches | 13 |
| 2.4 Optics Design and Beam Dynamics | 13 |
| 2.5 Operation and Performance | 13 |
| 2.6 Ion Operation | 13 |
| 2.7 Lepton-Hadron Operation | 13 |
| 3 Collider Technical Systems | 15 |
| 3.1 Requirements and Design Considerations | 15 |
| 3.2 Magnet System | 15 |
| 3.2.1 Introduction | 15 |
| 3.2.2 Superconducting Main Dipole | 15 |
| 3.2.3 Low Temperature Superconductors | 15 |
| 3.2.4 Final Focus Magnets | 15 |
| 3.2.5 Other Magnets | 15 |
| 3.2.6 Magnet Powering | 15 |
| 3.3 Cryogenic Beam Vacuum System | 15 |
| 3.3.1 Overview | 15 |
| 3.3.2 Beam Screen | 15 |
| 3.3.3 Vacuum | 15 |
| 3.4 Radiofrequency System | 15 |
| 3.4.1 Overview | 16 |
| 3.4.2 Superconducting Accelerating Cavities | 16 |
| 3.4.3 Crab Cavities | 16 |
| 3.4.4 Powering and Low-Level RF | 16 |

| | | |
|----------|--|-----------|
| 3.4.5 | Beam Feedback | 16 |
| 3.5 | Beam Transfer Systems | 16 |
| 3.5.1 | Overview | 16 |
| 3.5.2 | Injection | 16 |
| 3.5.3 | Extraction | 16 |
| 3.5.4 | Dumping | 16 |
| 3.6 | Collimation Systems | 16 |
| 3.6.1 | Overview | 16 |
| 3.6.2 | Betatron Collimation | 16 |
| 3.6.3 | Momentum Collimation | 16 |
| 3.7 | Other Systems | 16 |
| 3.7.1 | Overview | 16 |
| 3.7.2 | Beam Diagnostics Requirements and Concepts | 16 |
| 3.7.3 | Element Support, Survey and Alignment Requirements, and Concepts | 16 |
| 3.7.4 | Magnet Powering Requirements and Concepts | 16 |
| 3.7.5 | Machine Protection Concepts | 16 |
| 3.7.6 | Controls Requirements and Concepts | 16 |
| 3.8 | Radiation Environment | 16 |
| 4 | Civil Engineering | 17 |
| 4.1 | Requirements for upgrade of the existing infrastructure | 17 |
| 4.2 | Underground Structures | 17 |
| 4.2.1 | Tunnels | 17 |
| 4.2.2 | Caverns | 17 |
| 4.3 | Surface Points | 17 |
| 5 | Technical Infrastructures | 19 |
| 5.1 | Requirements and Design Considerations | 19 |
| 5.2 | Piped Utilities | 19 |
| 5.3 | Heating, Ventilation, Air Condition, Cooling | 19 |
| 5.4 | Electricity Distribution | 19 |
| 5.5 | Emergency Power | 19 |
| 5.6 | Cryogenic System | 19 |
| 5.6.1 | Overview | 19 |
| 5.6.2 | Proximity Cryogenics and Heat Loads | 19 |
| 5.6.3 | Cryogenic Plants | 19 |
| 5.6.4 | Cryogen Inventory and Storage | 19 |
| 5.7 | Equipment Transport and Handling | 19 |
| 5.8 | Person Transport | 19 |
| 5.9 | Geodesy, Survey, Alignment and Element Support | 19 |
| 5.10 | Communications, Computing and Data Services | 19 |
| 5.11 | Safety and Access Management Systems | 19 |

| | | |
|-----------|---|-----------|
| 6 | Injector Scenarios | 23 |
| 6.1 | Requirements and Design Considerations | 23 |
| 6.2 | Superconducting SPS | 23 |
| 6.3 | Transfer Lines | 23 |
| 6.4 | Alternative Injection at 450 GeV | 23 |
| 7 | Experiments and Detectors | 25 |
| 7.1 | Physics and Detector Performance Considerations | 25 |
| 7.2 | Boundary Conditions | 25 |
| 7.3 | Detector Reference Design | 25 |
| 7.4 | Magnet System | 25 |
| 7.5 | Detector Subsystem Concepts | 25 |
| 7.5.1 | Tracking | 25 |
| 7.5.2 | Electromagnetic Calorimeter | 25 |
| 7.5.3 | Hadron Calorimeter | 25 |
| 7.5.4 | Muon Detector | 25 |
| 7.5.5 | Trigger and Data Acquisition | 25 |
| 7.6 | Radiation Environment | 25 |
| 7.7 | Infrastructure Requirements | 25 |
| 7.8 | Special Purpose Experiments: Ions | 25 |
| 7.9 | Special Purpose Experiments: Lepton-Hadron | 25 |
| 8 | Safety | 27 |
| 8.1 | Requirements and Approach Considerations | 27 |
| 8.1.1 | Legal Requirements | 27 |
| 8.1.2 | Hazard and Risk Management Concept | 27 |
| 8.2 | Occupational Health and Safety | 27 |
| 8.3 | Radiation Protection | 27 |
| 9 | Energy Efficiency | 29 |
| 9.1 | Requirements and Design Considerations | 29 |
| 9.2 | Power Consumption | 29 |
| 9.3 | Energy Management and Saving | 29 |
| 9.4 | Waste Heat Valorisation | 29 |
| 10 | Environment | 31 |
| 10.1 | Requirements and Approach Considerations | 31 |
| 10.1.1 | Legal Requirements | 31 |
| 10.1.2 | Environmental Compatibility Management Concept | 31 |
| 10.2 | Environmental Impacts | 31 |
| 10.2.1 | Radiological Impacts | 31 |
| 10.2.2 | Conventional Impacts | 31 |

| | | |
|-----------|--|-----------|
| 10.3 | Waste Management | 31 |
| 10.3.1 | Radioactive Waste Management | 31 |
| 10.3.2 | Conventional Waste Management | 31 |
| 11 | Education, Economy and Society | 33 |
| 11.1 | Requirements and Approach Considerations | 33 |
| 11.2 | Host State Realization Concept | 33 |
| 11.2.1 | France | 33 |
| 11.2.2 | Switzerland | 33 |
| 11.3 | Socio-Economic Opportunities | 33 |
| 11.3.1 | Scientific Publications | 33 |
| 11.3.2 | The Value of Training | 33 |
| 11.3.3 | Opportunities for Industries | 33 |
| 11.3.4 | Cultural Effects | 33 |
| 11.3.5 | The Value of Knowledge | 33 |
| 12 | Strategic Research and Development | 35 |
| 12.1 | Strategic Considerations | 35 |
| 12.2 | Accelerator Related R&D | 35 |
| 12.3 | Detector Related R&D | 35 |
| 12.4 | Infrastructures Related R&D | 35 |
| 12.5 | Risks | 35 |
| 13 | Schedule Considerations | 37 |
| | Appendices | 39 |
| A | Collider Parameter Tables | 39 |
| A | Collider | 39 |
| B | LHC as Injector | 39 |
| C | Superconducting SPS | 39 |
| B | Experiment Parameter Tables | 41 |
| C | Infrastructures Parameter Tables | 43 |
| A | Layout | 43 |
| B | Civil Engineering | 43 |
| C | Resource Use | 43 |
| | Glossary | 43 |
| | References | 48 |
