

Status Update for USATLAS Sites on OSG Migration

- OSG announcement and documentation on the migration plan
 - <https://opensciencegrid.github.io/technology/policy/service-migrations-spring-2018/>
 - Please see Brian's talk for more info
- Transition of the ticketing system
 - T2s will be using GGUS directly, T1 will need to set up interface between GGUS <-> RT
 - For T2s, the transition should be straightforward
 - Sort out site contact info on OIM, and register account on GGUS
 - Mark/SWT2 is going through the procedure using the test instance of GGUS. Will provide documentation for other T2s to follow.
 - OSG GOC footprints will coordinate with GGUS, make sure "open" GGUS tickets won't get accidentally closed when GOC footprints stops.
