SCHEDULE (in Globe, until 11:00)

Time	Subject	Speaker
08:00	Entrance formalities	
09:30	Welcome Head of HR Dept	James PURVIS
09:35	Presentations	
	Global presentation HR	Elizabeth EASTWOOD-BARZDO
	CERN Service Portal	Isabel FERNANDEZ GONZALEZ
	IT Service	Nino SEGURA CHINCHILLA
	Safety at CERN	Christoph BALLE
	CERN Staff Association	Jenni SUUTULA
10:25	Q&A: Ask the Experts	
11:00	End of session in Globe	

First things to do ...

Les premières choses à faire...

1. Fill out the documents in your folder

Compléter les documents se trouvant dans votre pochette

2. Go to one of the desks, according to your status

Aller à l'une des tables, en fonction de votre statut

After the entrance formalities, you can... *Après les formalités d'arrivée, vous pouvez...*

- **Grab a coffee**
Prenez un café

- **Meet new colleagues**
Rencontrez des nouve.aux.elles collègues

- **Visit the Exhibition on the ground floor**
Visitez l'Expo au RdC du Globe

Please be back at 09:30 (start presentations)
Veillez svp être de retour à 09h30 (début présentations)

Working at CERN
is about...
Purpose

*Le travail au CERN
c'est....
Un but commun*

CERN's people are driven by a shared goal, a single purpose.

***They want to achieve the impossible,
to do what's never been done before.***

***Everyone here strives to be the best they can be,
true specialists and industry "firsts" are created regularly – not just
in the world of physics.***

Working at CERN
is about...
Challenge

*Le travail au CERN
c'est....*
Relever les défis

Unravelling the mysteries of the universe: it's a big task. And that's one of the reasons that experts come to CERN – to test themselves, push their abilities and help create history with groundbreaking discoveries.

But this is not just about physics. The engineering and technical skills needed to make the experiments succeed are as world-class as the science behind them. If you want to help answer the world's toughest questions, this is the place to do it.

Working at CERN
is about ...
Integrity

*Le travail au CERN
c'est....
L'intégrité*

This is a word that is included in the CERN values, but it's something that can be claimed by any number of organisations, so what does it actually mean here?

Respect isn't handed out automatically at CERN – it's earned.

But, because of the nature of the work, people act with integrity.

People are driven by scientific discovery. Their motivations are pure.

They trust and are trusted.

Working at CERN
is about...
Collaboration
*Le travail au CERN
c'est....*
La collaboration

CERN is an employer, a university and a state: a whole community working towards a shared goal – scientific discovery. This creates a collaborative world.

Seniors work with graduates. Physicists need engineers.

Countries forget politics and collaborate to achieve.

And knowledge – CERN's main commodity – is shared throughout CERN, its member states and the rest of the world.

Working at CERN
is about...

Imagination

*Le travail au CERN
c'est....*

L'imagination

This is work without boundaries.

People here are realising the impossible.

Pushing what is known and accepted with the courage to ask, “what if?”

They have the freedom to think differently, to imagine, and to find improbable solutions to problems that have never been asked before.

They are free to take chances, to challenge ideas and to enjoy unrestrictive working practices.

Working at CERN is
about...

Quality of life

*Le travail au CERN
c'est....*

La qualité de vie

*People here enjoy living a truly cosmopolitan life, in the heart of Europe.
The environment offers a myriad of leisure activities, both on Lake Geneva and
the surrounding mountains.*

*With excellent benefits, great remuneration and the freedom to work flexibly, it's
not just the work and atmosphere that makes people enjoy their jobs, it's the
tangible elements that they receive too.*
