

NA62 report to the SpS meeting
26/7/2018

Silvia Martellotti

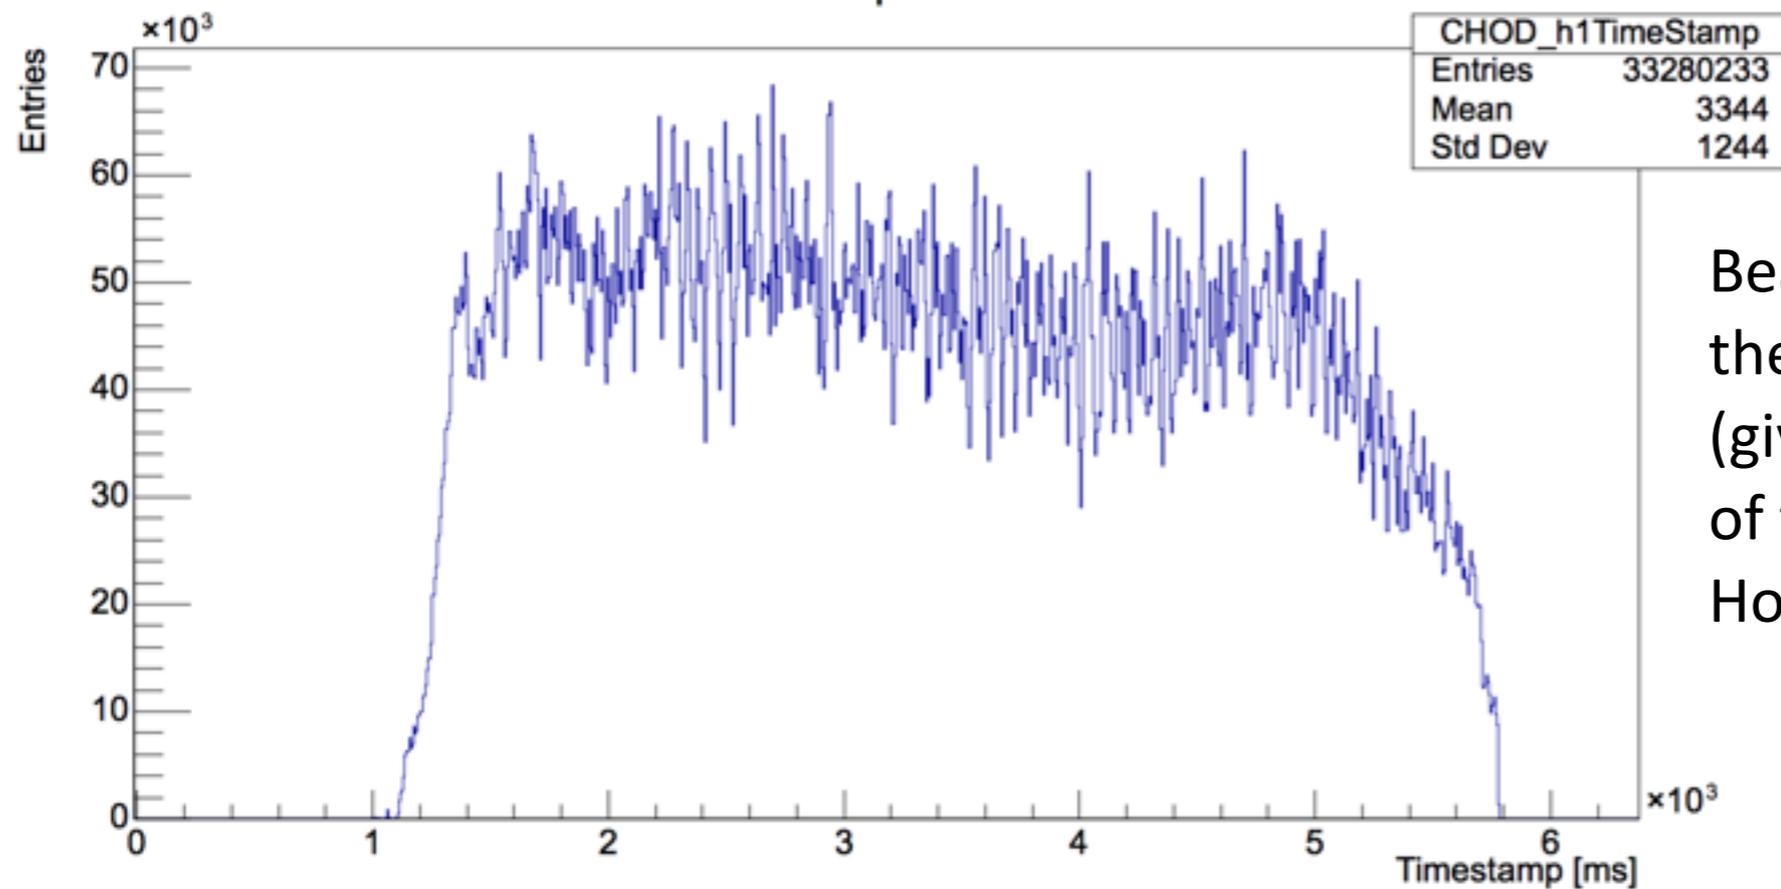

Trigger rate (L0/5 - L1 - L2)

Example of standard **GOOD** data taking!

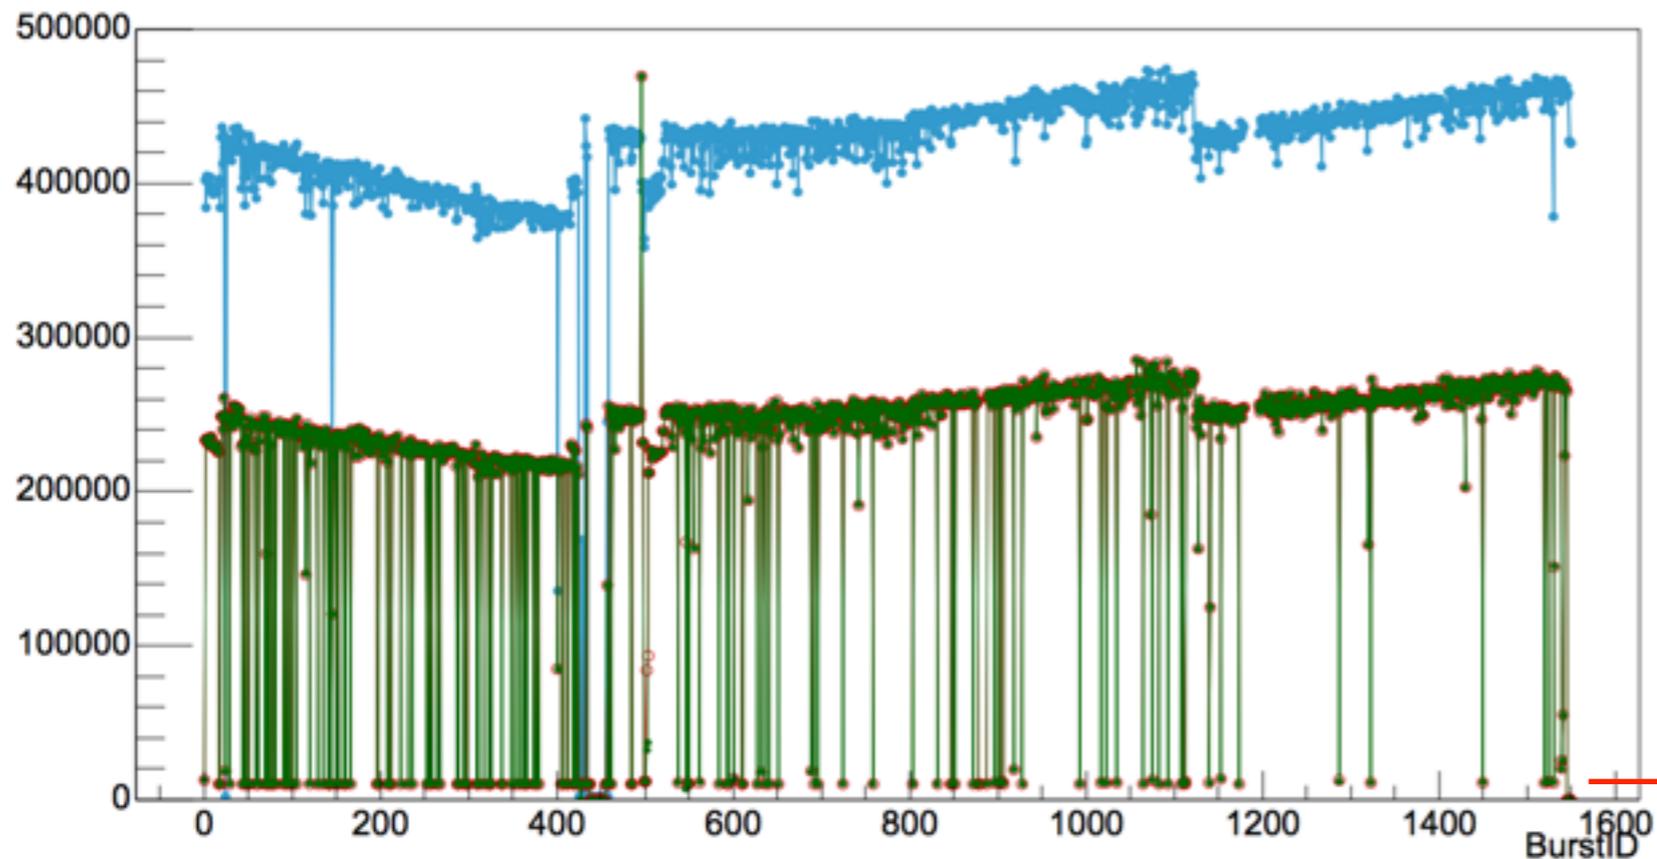

→ Events collected

Timestamp of CHOD

Beam profile along the burst (given by the triggers of the Charged Hodoscope Detector)

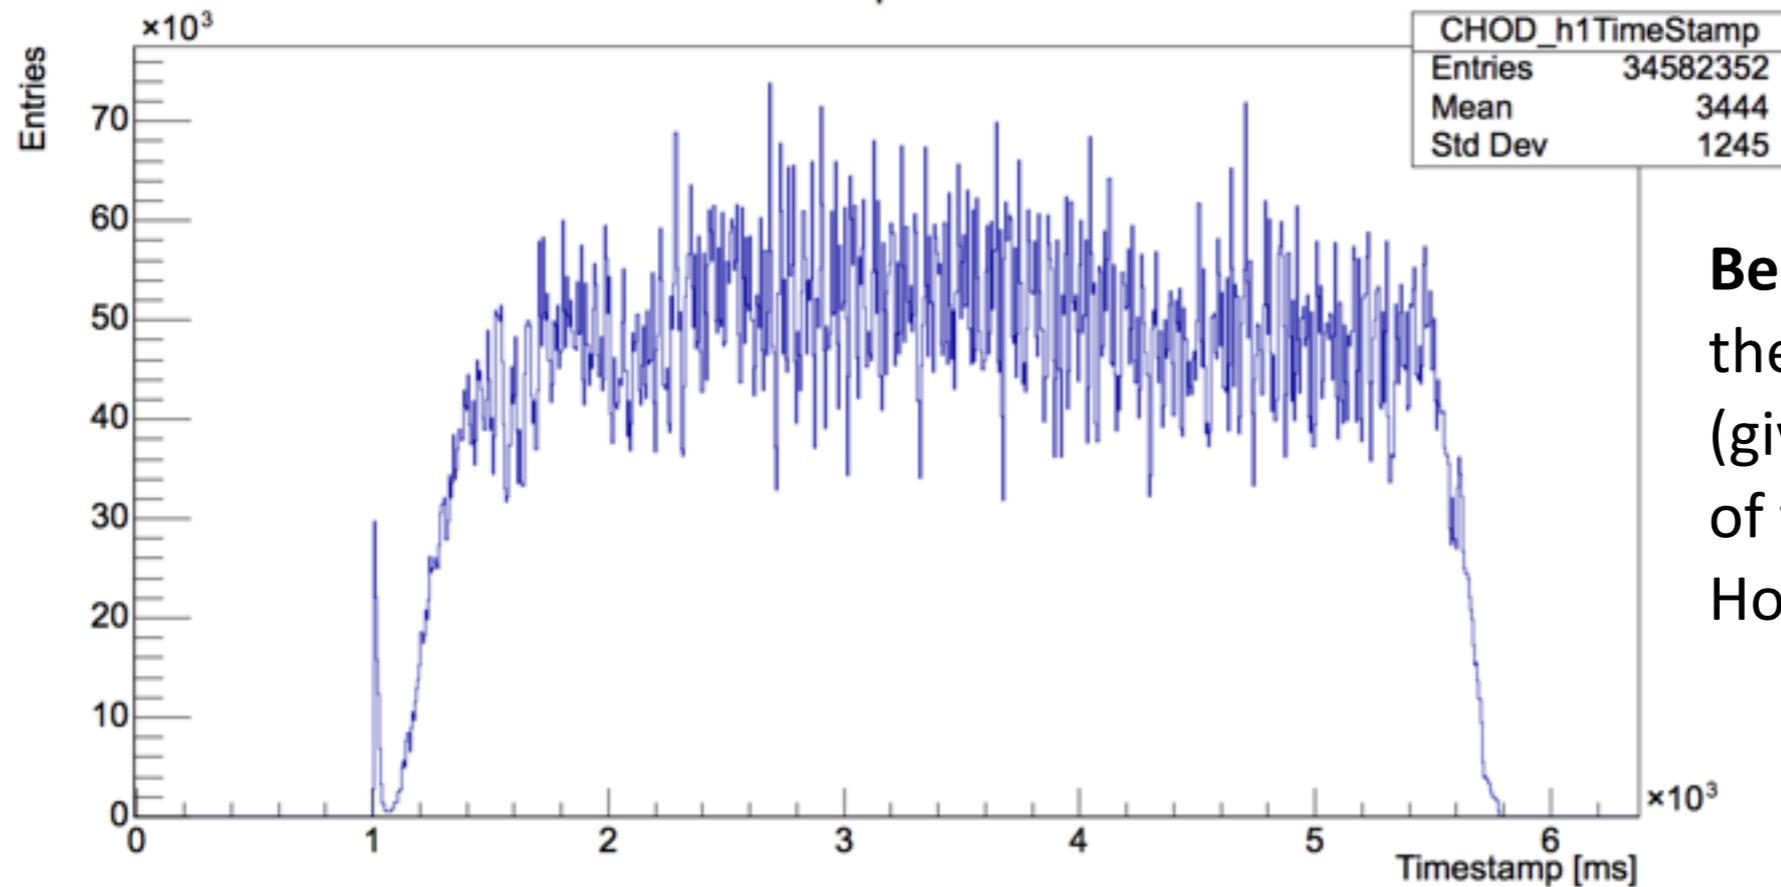

Trigger rate (L0/5 - L1 - L2)

Situation from Tuesday
24/07

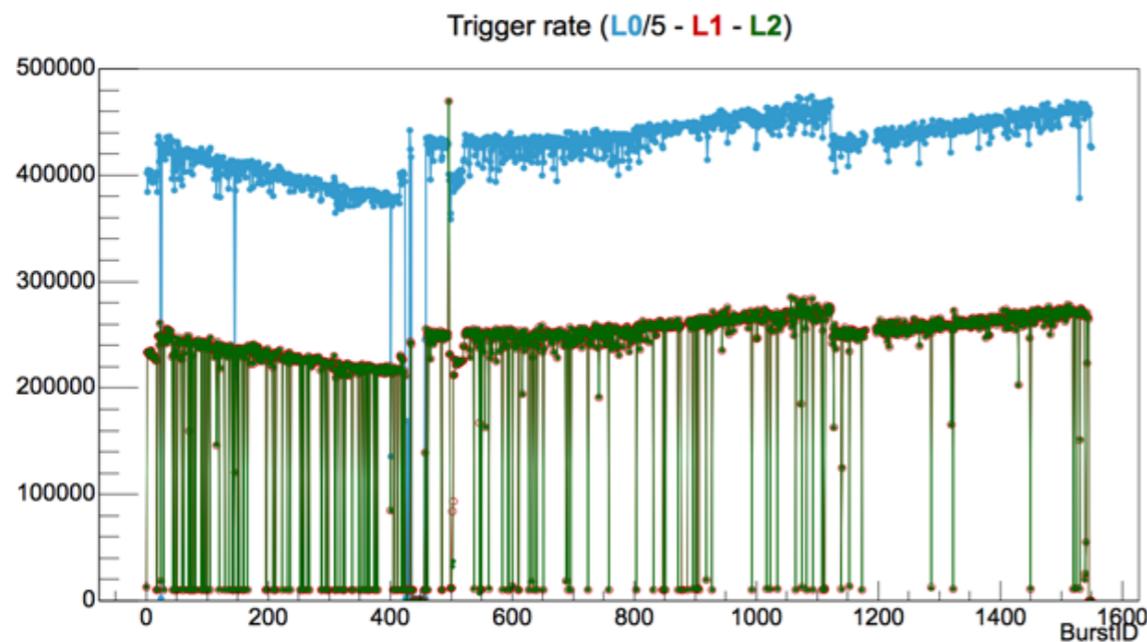

~40%: zero events collected

Timestamp of CHOD

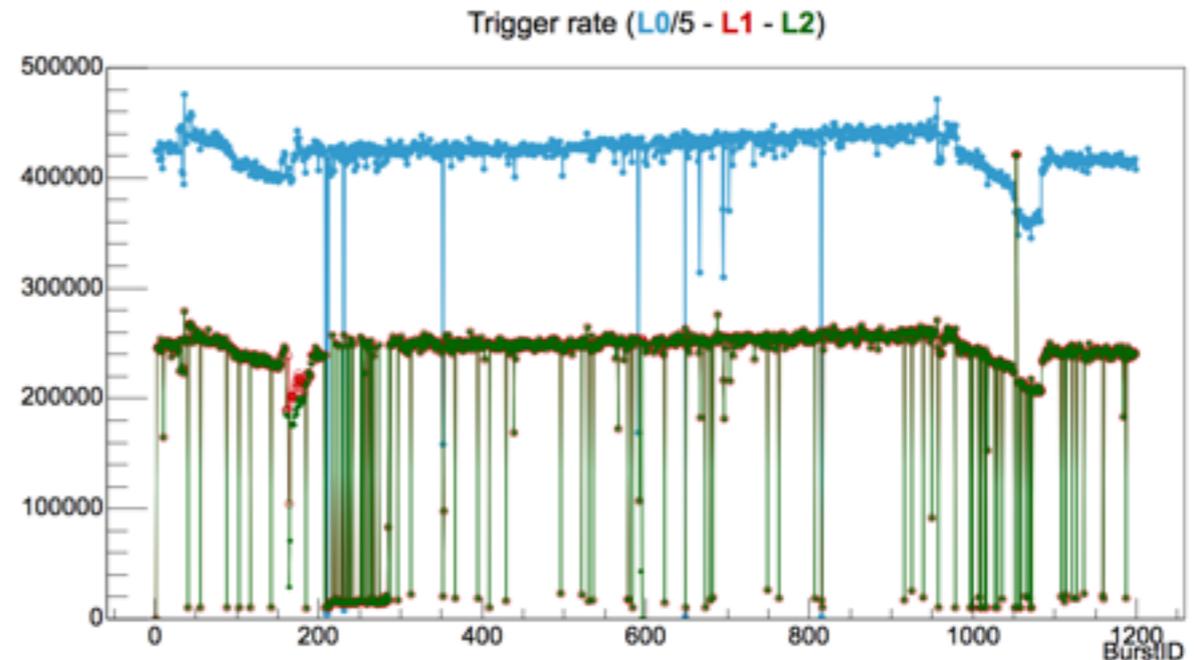

Beam profile along
the burst
(given by the triggers
of the Charged
Hodoscope Detector)

Troubles due to the beam profile

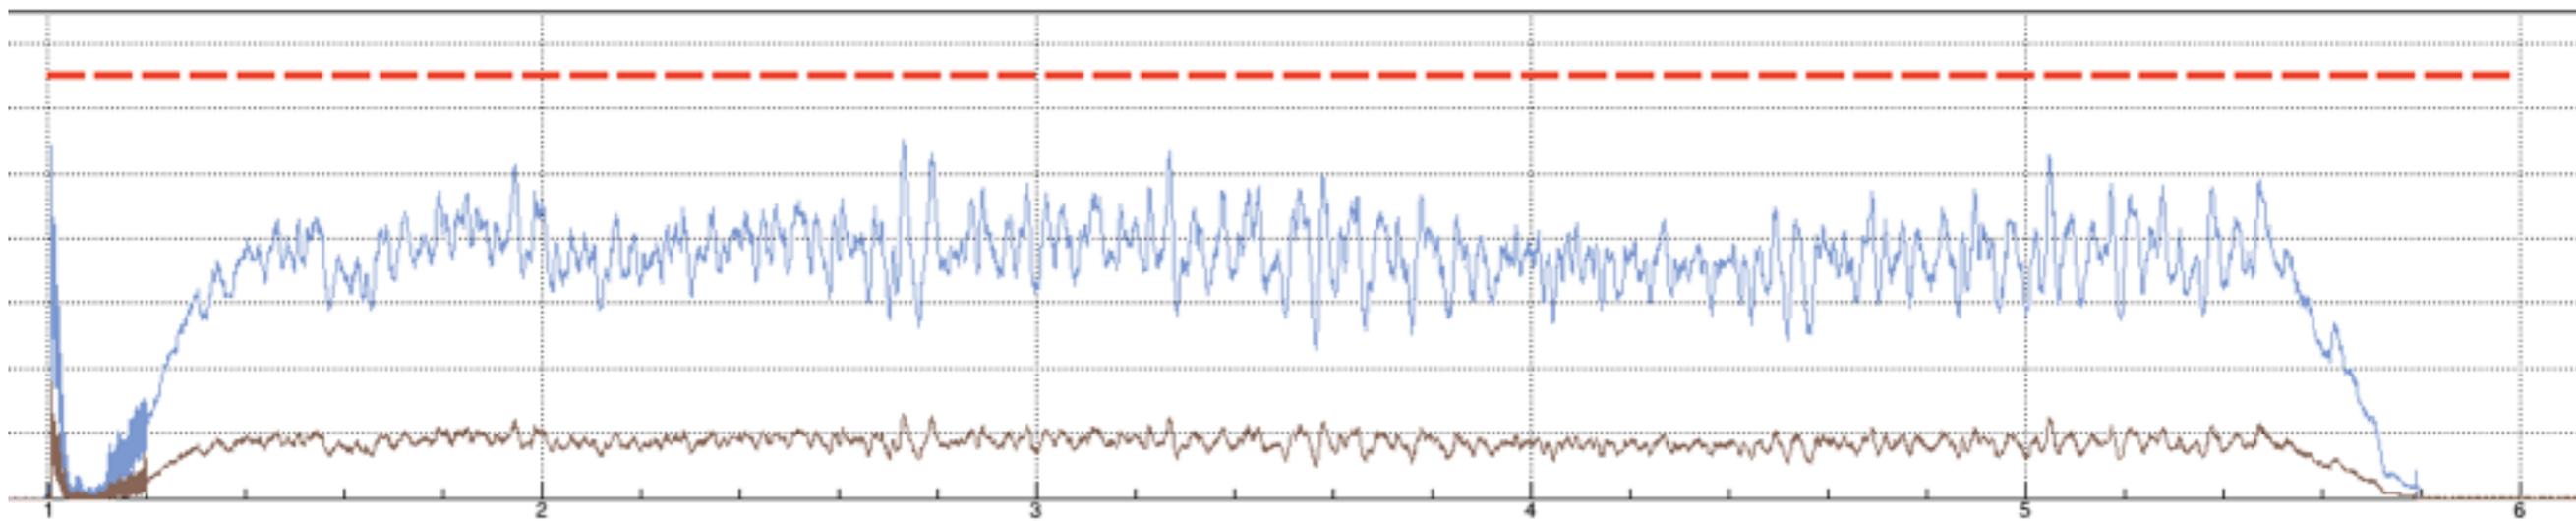

Tuesday daytime (24/07)

Wednesday night (25/07)

Fast beam-profile Run: 8958 Burst: 300 Detector: `chod(lkr)` - 24/07/2018 13:18

Spike at the beginning of the burst or **too high instantaneous intensity** crashes our data acquisition
