【54】 Physics –a teacher’s life!

Wednesday, August 29, 2018 2:40 PM (20 minutes)

After studying physics at ETHZ I had the opportunity to do my PhD at IBM Research Lab in Rüschlikon. In addition, I achieved my diploma in teaching physics. Subsequently, I worked for 3 years in industry before starting as a physics teacher at the Gymnasium and now being able to teach as well mathematics. I will present on the opportunity to adapt the chosen career path and to benefit from the experience in various areas, namely research, business projects, school environment and last but not least the own family (I am mother of 3 children!). Moreover, I would like to show you the possibility of combine career and family.
