

SUMMER STUDENT LECTURE PROGRAMME 2018

Lecture Title

Lecturer's name

E-mail Address

Short CV

tinasj@ymail.com

Lecture Content

This lecture will introduce you to the world of exotic nuclei: what are exotic nuclei and why to study them, how are they produced at ISOLDE, which properties can we measure and how, for what other studies can exotic nuclei be used.

Pre-requisites:
earlier series of lectures
that the students
should follow

no other courses should be followed before

Other pre-requisites:

the course aims to be comprehensive, so no prior knowledge is required.
