

Tier 2 in 2

A summary in 2 minutes or less

Robin Long
June 19, 2018

Status I

- Site capacity: 5000 cores, 2.5PB disk
- Shared cluster
 - Opportunistic use of local resources.
 - Plenty of expansion room.
- Most services virtualised (VMWare), more on the way.
- C7 Status: All compute, New Storage. Old storage still SL6.
- DPM needs upgrade to non-legacy and C7.
- IPv6:
 - Storage, dual stacked.
 - SQUIDs are next
- Storage:
 - New storage is jbods + zfs.
 - No plans to retrofit old storage.

Status II

- Ansible:
 - Completed: BDII, SQUID, ARGUS (Partial)
 - To Do: CE(ARC), SGE Host
- Monitoring:
 - Stable, but desire to move on.
- Singularity:
 - Working locally.
 - Issues getting working with Grid.
