

EGI InSPIRE and the Other Projects- personal view

- For the Proposal the Projects I see more relevant are
 - EMI
 - The SSC Proposals
- EMI in SA2 and SA3 (table 3.1!)
- SSCs mainly in NA3
- Describe somewhere (NA2?) how these projects integrate the Blueprint scenario
- Describe the process for keeping the Projects technical coordination via the proper bodies
 - No new bodies required
 - MCB, USAG, (others) should take this role
