Synchronization and Sharing Services in IHEP

Tuesday 29 January 2019 16:30 (15 minutes)

In order to provide a secure personal storage space for IHEP users, IHEPBox is built with the open source own-Cloud. The platform integrates an LDAP database (AD domain) ,and we use EOS to storage users data, deploy the onlyoffice to provide office online services , and setup jupyter services to provide users with data analysis based on WEB, which will meet the needs of interactive data analysis for high-energy physics experiments.

Authors: Mr MENGYAO, Qi (Institute of High Energy Physics, CAS); Dr LIN, Tao (Institute of High Energy Physics, CAS)

Presenter: Mr MENGYAO, Qi (Institute of High Energy Physics, CAS)
